

# How to install the Administration addon in Soffid

## Installation

### Introduction

To use an addon in Soffid, you must download and install it in the Console. There are two ways to do this.

- 1.** The first option is to use the **Soffid 4 marketplace**. You can download and upload it directly from the [Licence and plugin](#) page.
- 2.** The second option is to download the file from the Soffid **download** page and then **upload** it to the Console.

## Soffid 4 marketplace

Soffid 4 allows you to install and update plugins through the new Addons marketplace feature.

To access the marketplace, you must have a valid token to use Soffid and have configured the Console via https. Please check the [License and plugin](#) page.

- 1.** Please **log in** to IAM Console.

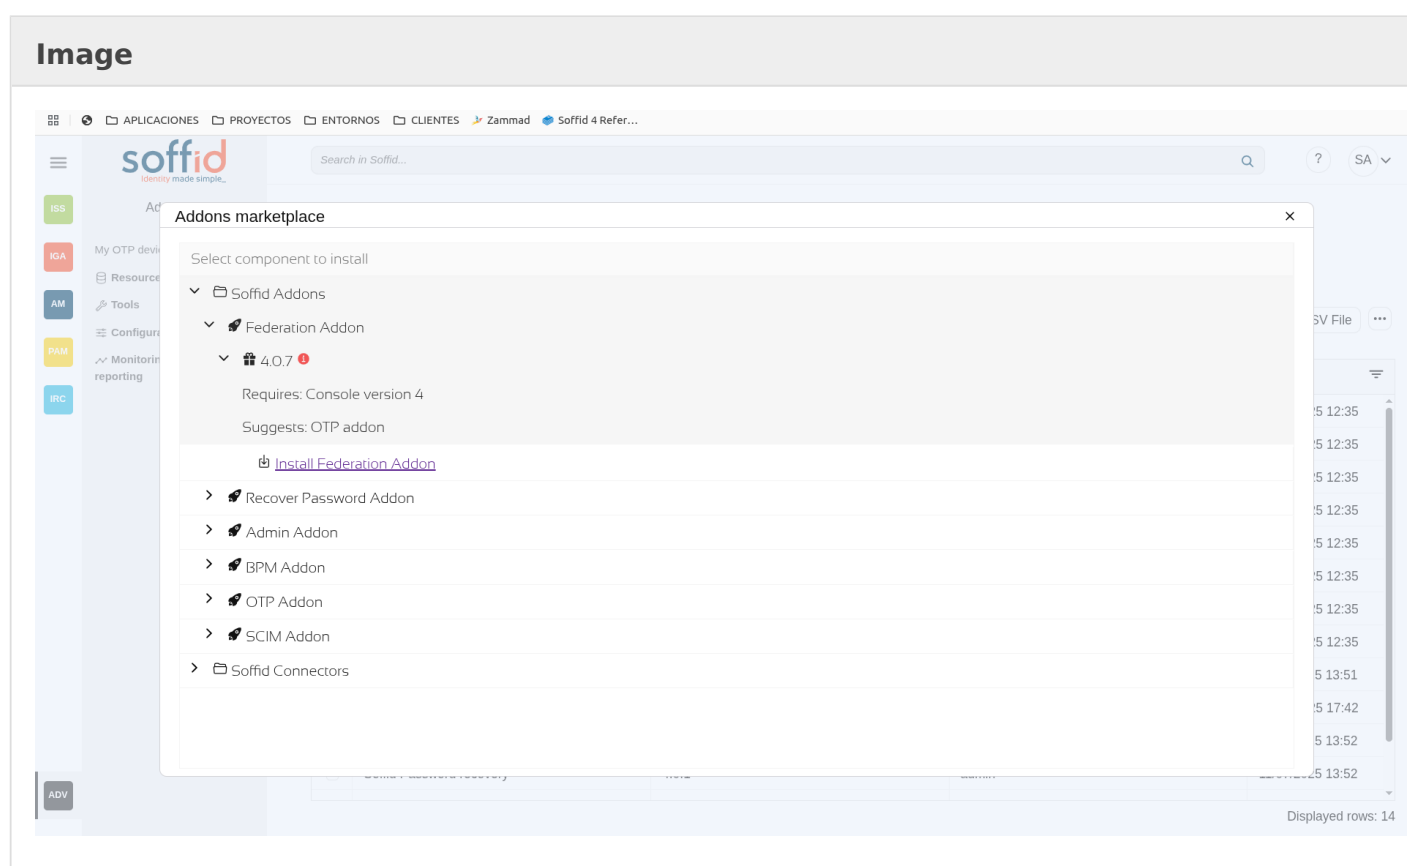

You need to be an **administrator** user of the Soffid console or a user with permission to upload addons.

It is recommended to upload the addons to the **master**, this is the way to maintain updated all, master and tenants if there are.

**2.** In the Soffid console, please **go to** the License and plugin page.

Main Menu > Configuration > Global Settings > License and plugin

**3.** Then, click the add button "**Add new**" button, open the "Soffid Addons" section and select the "Instlla addon" option, Soffid will upload the addon file.

4. Finally, when the addon is installed, the Consola has to be **restarted**, a popup will be displayed to perform this action, you can choose to do it now or later.

5. Once the Soffid console has restarted, you can **check** if the plugin was correctly uploaded on the "License and plugins" page.

Main Menu > Configuration > Global Settings > License and plugin

6. Now, you can **configure** the addon.

## Download an upload

1. You could **download** the addon at the following link

<http://www.soffid.com/download/enterprise/> if you have a Soffid user with authorization, or in the following <http://download.soffid.com/download/> by registering.

The addons are in the Addon section.

2. Once the addon is downloaded, please **log in** to IAM Console.

You need to be an **administrator** user of the Soffid console or a user with permission to upload addons.

It is recommended to upload the addons to the **master**, this is the way to maintain updated all, master and tenants if there are.

3. In the Soffid console, please **go to** the [License and plugin](#) page.

Soffid 3:

Main Menu > Administration > Configuration > Global Settings > Plugins

Soffid 4:

Main Menu > Configuration > Global Settings > License and plugin

4. Then, click the add button "**Upload**" and pick the file and click the "Select" button and Soffid will upload the addon file.

The screenshot shows the Soffid web interface. The top navigation bar includes a search bar and user profile. The left sidebar contains navigation items: ISS, ICA, AM, PAM, and IRC. The main content area displays the 'License and plugin' page, which shows a license valid until 14/07/2026 and a table of installed plugins. The 'Upload' button is highlighted with a red box. Below the main content, an 'Open File' dialog box is open, showing a file explorer view of the 'addons' directory. The dialog box has 'Cancel' and 'Select' buttons. The file explorer shows a list of files with columns for Name, Size, Type, and Modified.

Question

Do you want to restart server?

Yes No

**6.** Once the Soffid console has restarted, you can **check** if the plugin was correctly uploaded on the "License and plugins" page.

Main Menu > Configuration > Global Settings > License and plugin

**7.** Now, you can **configure** the addon.
