<b>Download</b>	Allows you to download an XML file with the user. You only need to click on the download icon of one of the records and save the file on your computer.
<b>Restore</b>	Allows you to restore one or more users' snapshots. First of all, you need select one or more snapshots. Second, you need to click the restore button. Then Soffid will run the restore process.

# User backup configure

## Description

Soffid allows you to configure some backup parameters.

Go to In the "User backup configure & restore" page, in the hamburger button click the option "Configure backup".

## Screen overview

The screenshot shows a dialog box titled "Configure backup parameters". It contains three configuration options: "Minimum delay between backups :" with a numeric input field set to 30, "Number of backups to keep alive :" with a numeric input field set to 10, and "Enable entitlements history :" with a toggle switch currently set to "Yes". At the bottom right of the dialog are two buttons: "Accept" and "Cancel".

## Custom attributes

- **Minimum delay between backups**
- **Number of backups to keep alive**
- **Enable entitlements history**

## Actions

Accept	Allows you to save the configuration.
--------	---------------------------------------

<b>Cancel</b>	Allows you to cancel any change and close the configuration window.
