Introduction to Backup

What is the Backup addon?

Soffid allows you to add a backup addon to the console to save a snapshot for each user to keep track of changes as they occur.

Main Menu > Administration > Configuration > Global Settings > User backup configure & restore

On the **User backup configure & restore** page you could manage the user snapshots and configure the backup.

- To configure the backup you need to configure some parameters
- To restore user data for a specific date, you only need to select the proper record and click the restore button.

The user's snapshot will be available on the [User page](#) as well. There you could manage the user backup data.

How to install Backup addon in Soffid

Installation

Download

Please download the Soffid Backup add-on.

You could download it at the following link <http://www.soffid.com/download/enterprise/> if you have a Soffid user with authorization, or in the following <http://download.soffid.com/download/> by registering.

Upload

1. Once the Backup add-on is downloaded, please log in to IAM Console.

You need to be an administrator user of the Soffid console or a user with permission to upload addons.

It is recommended to upload the addons to the master, this is the way to maintain updated all, master and tenants if there are.

2. In the Soffid console, please go to:

Main Menu > Administration > Configure Soffid > Global Settings > Plugins

3. Then, click the add button (+) and pick the file and Soffid will upload the addon file.

For more information visit the [Addons Getting started](#) page.

4. Finally, when the addon is installed, it will be required to restart the Soffid Console.

5. Once the Soffid console is restarted, you could check the plugin was uploaded properly on the plugins page:

Main Menu > Administration > Configure Soffid > Global Settings > Plugins

6. Now, you can set-up the Backup.

User backup configure & restore

User backup restore

Description

On the **User backup configure & restore page**, you could search, check and restore the user's snapshots.

Main Menu > Administration > Configuration > Global Settings > User backup configure & restore

Screen overview

Main Menu > Administration > Configuration > Global Settings > User backup configure & restore

User backup configure

Description

Soffid allows you to configure some backup parameters.

Go to In the "User backup configure & restore" page, in the hamburger button click the option "Configure backup".

Screen overview

The screenshot shows a dialog box titled "Configure backup parameters". It contains three configuration options:

- Minimum delay between backups :** A numeric input field with the value "30" and a spinner icon.
- Number of backups to keep alive :** A numeric input field with the value "10".
- Enable entitlements history :** A toggle switch currently set to "Yes" (green) with a "No" (blue) option.

At the bottom right, there are two buttons: "Accept" and "Cancel".

Custom attributes

- **Minimum delay between backups**
- **Number of backups to keep alive**
- **Enable entitlements history**

Actions

Accept	Allows you to save the configuration.
--------	---------------------------------------

Cancel

Allows you to cancel any change and close the configuration window.
