# User backup configure

## Description

Soffid allows you to configure some backup parameters.

Go to In the "User backup configure & restore" page, in the hamburger button click the option "Configure backup".

## Screen overview

The screenshot shows a dialog box titled "Configure backup parameters". It contains three configuration options:

- Minimum delay between backups :** A numeric input field with the value "30" and a spinner icon.
- Number of backups to keep alive :** A numeric input field with the value "10".
- Enable entitlements history :** A toggle switch currently set to "Yes" (indicated by a green box) and a "No" button (indicated by a blue box with three vertical bars).

At the bottom right of the dialog are two buttons: "Accept" and "Cancel".

## Custom attributes

- **Minimum delay between backups**
- **Number of backups to keep alive**
- **Enable entitlements history**

## Actions

Accept	Allows you to save the configuration.
--------	---------------------------------------

<b>Cancel</b>	Allows you to cancel any change and close the configuration window.
