Authorizations descriptor

The authorization descriptor is an XML describing the different authorizations that can be granted to users.

This file should be located at /com/soffid/addon/authorization.xml

The template for this file is:

```xml
<?xml version="1.0" encoding="utf-8"?>
<autoritzacions>
 <autoritzacio>
        <!-- Required: authorization name -->
    <codi>addon:privacy:create</codi>
        <!-- Required: Functional area description -->
    <ambit>Privacy</codi>
        <!-- Required: authorization full description -->
    <descripcio>Create privacy records</descripcio>

        <!-- Optional: scope of the authorization. It can contain a comma separated list of -->
        <!-- GRUP => Group scoped role -->
        <!-- APLICACIONS => Information system scoped role -->
    <tipusDomini>GRUPS</tipusDomini>
        <!-- Optional: how the authorization will spread along business units -->
        <!-- children => the permission will be effective on business unit and its children -->
        <!-- parent   => the permission will be effective on business unit and its parents -->
        <!-- both     => the permission will be effective on business units, its parents and its children -->
    <scope>children</scope>
        <!-- Permissions that will be granted to anyone with this permission -->
    <hereta>
      user:query,
      group:query
    </hereta>
  </autoritzacio>
  ...
</autortizacions>
```
