

# Design user life cycle workflows

## Description

When you select the option "Design user life cycle workflows", Soffid will browse to the BPM Editor page, where you could define new workflows or import existing workflows from a file.

For more information, you can visit [the BPM Editor book](#).

## Screen overview

The screenshot displays the Soffid user interface. At the top, there is a dark header bar with the Soffid logo on the left, a search bar in the center, and a help/question mark icon and a settings gear icon on the right. Below the header, a breadcrumb navigation path is shown: [Main Menu](#) > [Administration](#) > [Configuration](#) > [Workflow settings](#) > BPM editor. A hamburger menu icon is visible on the far right of this path. The main content area features a list of process management options: "Process" (highlighted with a green bar), "User management", "Permissions management", "Account reservation" (with edit, delete, and refresh icons), and "Delegate roles". A teal circular button with a white plus sign is located in the bottom right corner of the interface.
