How to add to ESSO a second factor of authentication?

Introduction

Soffid allows you to add a second factor of authentication by configuring a parameter in Soffid Console and the Second Factor Authentication (2FA).

Step by step

1. First of all, you need to configure the **addon.federation.essoidp** parameter. The value must be the Identity Provider Identifier:

2. Then, you need to add the 2FA in the proper Identity Provider:
