
CAS

Definition

Cas protocol is rarely used.

Screen overview

The screenshot shows a configuration interface for the CAS protocol. It includes a 'Class' field with the value 'CasProfile' and an 'Enabled' field with a green 'Yes' button and a blue 'No' button. An 'Apply changes' button is located in the bottom right corner.

Standard attributes

- **Class:** class name (readOnly field).
- **Enabled:** if it is checked (the selected option is Yes) that protocol will be enabled.
