

ESSO

Definition

Here is an explanation about how to configure the ESSO profile by using Soffid as Identity Provider.

Please note that the profile parameters will be automatically updated on the PCs.

Screen overview

Class :	<input type="text" value="Esso"/>		
Enabled :	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
Soffid main agent :	<input type="text" value="soffid"/>	 Soffid system	
Seconds to send keep alive from desktop to server :	<input type="text" value="60"/>		
Timeout to close sessions :	<input type="text" value="180"/>		
Enable Windows credential provider :	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Display last logged-on user :	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
Create local accounts when there is no domain account :	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Maximum number of consecutive days to allow an off-line logon :	<input type="text" value="Maximum number of consecutive days to allow an off-line logon"/>		
Enforce ESSO session when desktop gets on-line. :	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Enforce ESSO sessions :	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Let the user close the ESSO session :	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		
Allow quickly (and insecure) switch between users :	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		
Hostname format :	<input type="text" value="Long (fully-qualified host name)"/>		

 Close

Standard attributes

- **Class:** class name (readOnly field).
- **Enabled:** if it is checked (selected option is Yes) that protocol will be enabled.
- **Soffid main agent:** main agent to check the user account.
- **Seconds to send keep alive from desktop to server:**
- **Timeout to close sessions:**
- **Enable Windows credential provider:** if it is checked (selected option is Yes), the soffid logo will be displayed.
- **Display last logged-on user:** if it is checked (selected option is Yes), the last logged-on user will be displayed.
- **Create local accounts when there is no domain account:** if checked (the selected option is Yes) and the account does not exist in the main Soffid agent, the account is created as a local machine user.
- **Maximum number of consecutive days to allow an off-line logon:** the maximum value is 30 days.
- **Enforce ESSO session when desktop gets on-line:** if it is checked (selected option is Yes), the authentication is forced when the connection is retrieved
- **Enforce ESSO sessions:** if it is checked (selected option is Yes), performs authentication against the Windows domain without logging into Soffid.
- **Let the user close the ESSO session:** allow the user to log out from ESSO
- **Allow quickly (and insecure) switch between users:** if it is checked (selected option is Yes),
- **Hostname format**

Configuration

Once you have configured the Esso profile you must add an Adaptive authentication rule.

For more information, visit [the Condition for Adaptive authentication page](#).

Adaptive authentication

Description :

Esso

Condition :

isEsso

Always ask for credentials :

No
