expire-session

Definition

- This operation allows to close a session created by either validate-credentials or parse-saml-response. If you want to get real global logout, this method invocation is not enough. You should also use the generate-saml-logout-request method.

URL

- <console-domain>/webservice/federation/rest/expire-session

Method

- POST

Headers

- Accept = “application/json”
- Content-Type = “application/json”

Authentication

- Use an account with **federation:serviceProvider** permission

Request (body JSON)

- sessionId → session id obtained from prior parse-saml-response or validate-credentials invocation

Response (JSON)

- sessionId → id of closed session

```
{
  "sessionId" :
"_8164940b408c1508dfd84525a3ef568475f317085cf36e7d:rvJgZnMfsWUbQWlXdhTcVGgI3mC2qXJC..."
}
```
