

PAM Rules

Definition

Soffid allows you to define rules to detect commands executed on a server. When a user launches a command defined on a rule, Soffid will detect it.

To use those rules you need to define the PAM policies. For more information, you can visit the [PAM policies page](#).

Standard attributes

- **Name:** name to identify the rule.
- **Description:** a brief description of the rule.
- **Type:** rule type.
 - **Keyboard:** Indicate the command typed in the terminal that you want to control.
 - **Screen:** Indicate the text displayed in the screen that you want to control.
- **Content:** the content of the rule that Soffid will detect. Be in mind, that Soffid will consider blanks, returns, and all characters you type.
- **Modified by:** user who modified that rule.
- **Modified on:** the date and time of the update.

Actions

PAM rules query

| | |
|------------------------------|--|
| Query | Allows you to query PAM rules through different search systems, Quick , Basic and Advanced . |
| Add or remove columns | Allows you to show and hide columns in the table. |
| Add new | Allows you to create a new PAM rule. You can choose that option on the hamburger menu or click the add button (+). To add a new PAM rule it will be mandatory to fill in the required fields. |
| Delete | Allows you to remove one or more PAM rules by selecting one or more records and next clicking the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. |
| Import | Allows you to upload a CSV file with the PAM rules list to add or update PAM rules to Soffid. First, you need to pick up a CSV file, that CSV has to contain a specific configuration. Then you need to check the content to be loaded, it is allowed to choose if you want or not to load a specific attribute. And finally, you need to select the mappings for each column of the CSV file to import the data correctly and click the Import button. |
| Download CSV file | Allows you to download a CSV file with the PAM rules information. |

PAM rules detail

| | |
|----------------------|---|
| Apply changes | Allows you to create a new configuration PAM rule or to update an existing one. To save the data it will be mandatory to fill in the required fields. |
| Undo | Allows you to quit without applying any changes made. |
| Delete | Allows you to delete a PAM rule. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. |
