Step 3.3. Entry point

Soffid allows you to manually create entry points to connect to information systems.

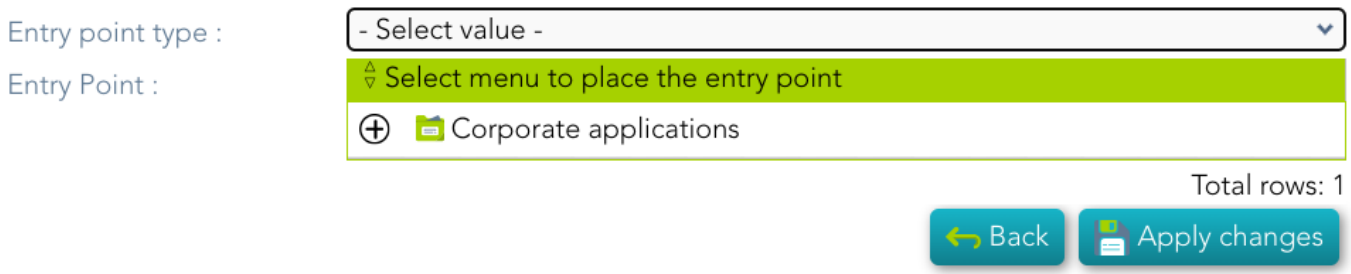

Step-by-step

1. Once the device is detected in the network, you could add new Entry points to this device. To add a new device you must click the *Add new* button

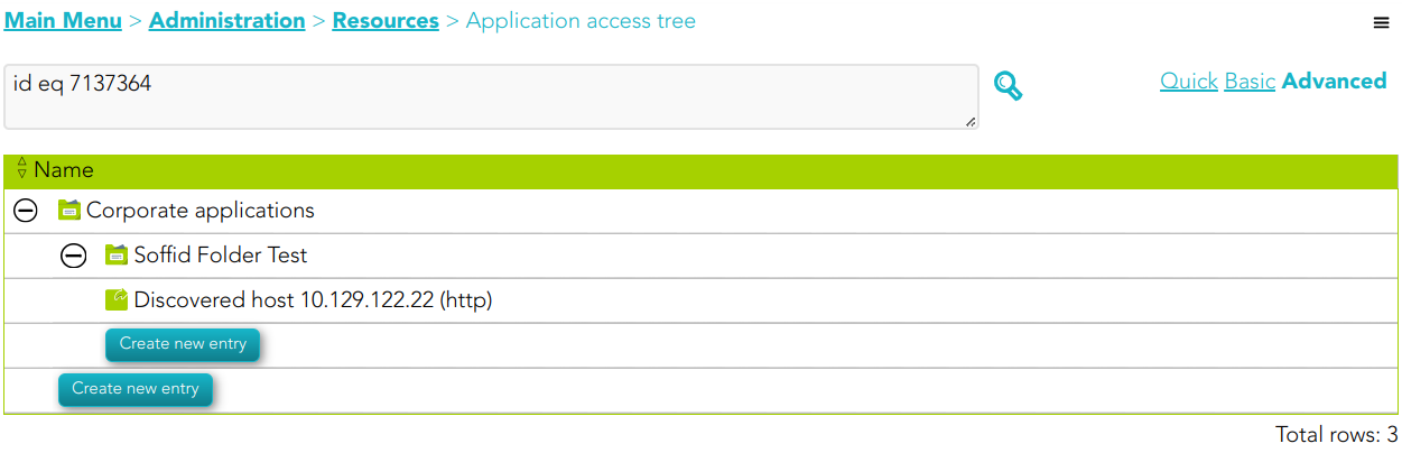

2. Then Soffid will display a new window to add the new Entry point. At this step, you need to select the Entry point type you are creating, and the menu to place the entry point.

- Secure shell (ssh)
- Secure web application (https)
- Web application (HTTP)

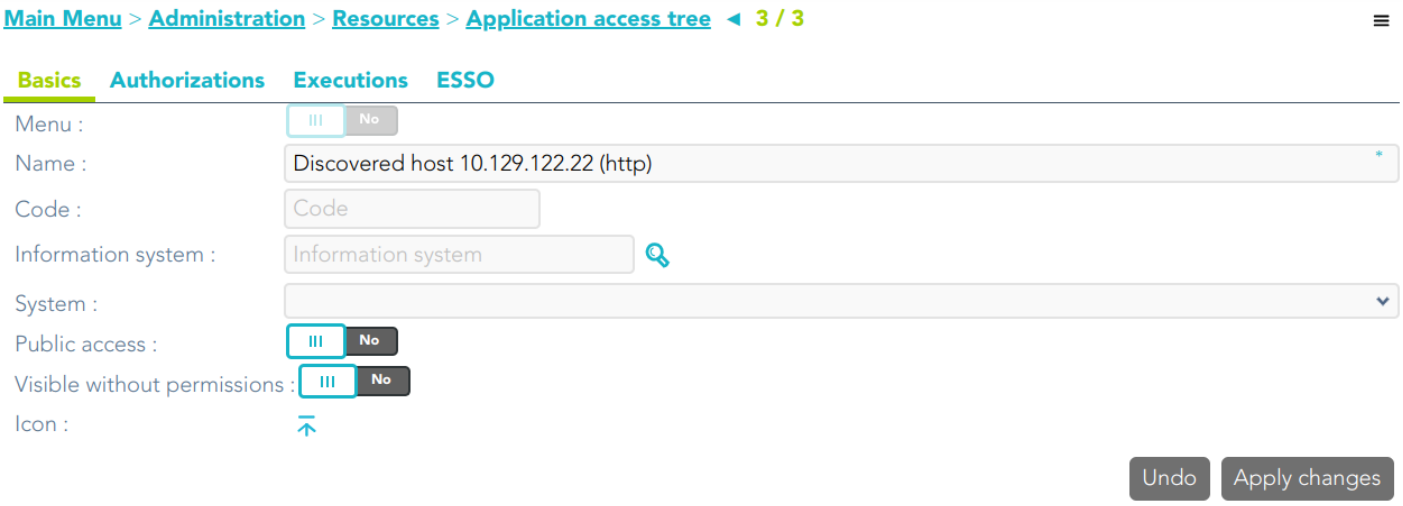

3. Finally you must save by clicking the *Apply changes* button

4. You could check the new Entry point by visiting the Application access tree page

Entry point detail
