RDP Gateway Connection

Introduction

We can establish a connection to the target system using the RDP remote access protocol. You can use a remote desktop client.

How to connect

You can establish the connection with the ssh gateway using a desktop client and then Soffid will ask you the parameters to connect:

- System name: system to which you want to connect.
- Account name: Soffid's account.
- Account system: account to use to connect to the target system.
