

SSH Gateway Connection

Introduction

We can establish a connection to the target system using the SSH remote access protocol.

How to connect 1

You can establish the connection with the ssh gateway and then Soffid will ask your password and the target system parameters to connect:

- **Password:** password of your account to connect to Soffid.
- **Target server:** system to which you want to connect.
- **Account to use:** account to use to connect to the target system.
- **Account source system**

```
root@soffid:~# ssh -p 2222 dilbert@ssh-gateway
Password:
Target server: 10.129.120.5
Account to use: patricia
Account source system [leave blank to use a target system local account]:

|      _      |
|     _/     |
|  _ _ /_/_° _|      | | | | |
| |_ / \ | | | / |      |
|  _|\_/ | | | \_/ SSH GATEWAY |
|     _/      |
|              |
| Hello dilbert      |
| NOTICE: This session is being recorded |
|_____|

Connecting to 10.129.120.5 as patricia
```

Last login: Fri Apr 8 08:39:23 2022 from 10.129.120.6

[patricia@forgecentos ~]\$

How to connect 2

You can establish the connection with the target system typing all the parameters to connect in one line AccountName__HostName__TargetAccount. At the end, Soffid will ask the password of your account to connect.

- **Account name:** account to connect to Soffid.
- **Host name:** target system to which you want to connect.
- **Target account:** account to connect to the target system.
- **Password:** password of your account to connect to Soffid.

```
root@soffid:~# ssh -p 2222 dilbert_10.129.120.5__patricia@ssh-gateway
```

Password:

```
_____
|      _      |
|     _/      |
|  _ _ /_ | ° _| | | |
| | _ / \ | | / |
| _ | \ / | | | \ / SSH GATEWAY |
|     _/      |
|              |
| Hello dilbert      |
| NOTICE: This session is being recorded |
|_____|
```

Connecting to 10.129.120.5 as patricia

Last login: Fri Apr 8 09:57:22 2022 from 10.129.120.6

[patricia@forgecentos ~]\$

How to connect 3

You can establish the connection with the target system typing all the parameters to connect in one line AccountName__HostName__TargetAccount and using a ssh key.

- **Account name:** account to connect to Soffid.
- **Host name:** target system to which you want to connect.
- **Target account:** account to connect to the target system.

You can generate an ssh key to connect or use your existing ssh key.

- Generate a new ssh key: `ssh-keygen -t rsa`
- Read an existing ssh key: `cat .ssh/id_rsa.pub`

Then you need to include it in Soffid Console in your user data.

Finally you can establish the connection.

```
pgarcia@soffid:~$ ssh -p 2222 pgarcia_10.129.120.5_patricia@ssh-gateway
```

```
_____
|      _      |
|     _/    |  | | | |
|  _ _ /_ | ° _|  |
| | _ / \ | | / |  |
|  _ | \ / | | | \ / SSH GATEWAY |
|     _/      |
|              |
| Hello pgarcia      |
| NOTICE: This session is being recorded |
|_____|
```

Connecting to 10.129.120.5 as patricia

Last login: Fri Apr 8 11:57:19 2022 from 10.129.120.6

[patricia@forgecentos ~]\$

Soffid needs the **ssh_key** attribute in the user object metadata, please check the attribute is created properly, and the fill in with your public key.

Object type : com.soffid.iam.api.User

Description : Builtin user object
