

# ☐☐ To bear in mind

If you are working with Mozilla Firefox, it will be possible that this message will be displayed.  
To solve it, you must allow the pop-up windows

The screenshot shows a Firefox browser window with the address bar displaying `https://demolab.soffid.pat.lab:8080/soffid/resource/account/vault.zul`. A notification bar at the top states: "Firefox ha impedido que este sitio abriera una ventana emergente. Preferencias". The page header includes the "soffid" logo and a search bar. The breadcrumb navigation is "Main Menu > Administration > Resources > Password vault" with a page indicator "8 / 10". The "Actions" tab is selected, showing a list of items with details like Name, Description, System, Login name, Login url, and In use by. A modal dialog titled "Warning: An error occurred" is displayed, with the message "Failed to process script" and a "close" button. Below the dialog, three buttons are visible: "Launch", "View password", and "Set now".

The screenshot shows the same Firefox browser window, but with a permission dialog box open. The dialog is titled "Permisos para demolab.soffid.pat.lab" and contains the option "Abrir ventanas emergentes" (Open pop-up windows) with a "Bloquear" (Block) button and a dropdown arrow. Below the option, it says "Abrir 1 ventana emergente bloqueada...". The background page content is partially obscured by the dialog. The "Warning: An error occurred" modal dialog is still visible in the background, showing the same "Failed to process script" message and "close" button. The "Launch", "View password", and "Set now" buttons are also visible at the bottom.
