

# ☐☐ To bear in mind

If you are working with Mozilla Firefox, it will be possible that this message will be displayed.  
To solve it, you must allow the pop-up windows

The screenshot shows a Firefox browser window with the address bar displaying `https://demolab.woffid.pat.lab:8080/woffid/resource/account/vault.zul`. A notification bar at the top states: "Firefox ha impedido que este sitio abriera una ventana emergente. Preferencias". Below the notification bar is the "woffid" logo and a search bar. The breadcrumb navigation shows: [Main Menu](#) > [Administration](#) > [Resources](#) > [Password vault](#) < 8 / 10 >. The "Actions" tab is selected, showing a list of items. The first item is "9" with the following details:

- Name : 9
- Description : MV - pgarcia - Ubuntu 2 --> Connect
- System : SSO - External SSO accounts
- Login name : pgarcia
- Login url : ssh://192.168.122.167
- In use by :

Below the list, there are three buttons: "Launch", "View password", and "Set now". A "Warning: An error occurred" dialog box is displayed over the "View password" button, with the message "Failed to process script" and a "close" button.

The screenshot shows the same Firefox browser window as above, but with a permission dialog box open. The dialog box is titled "Permisos para demolab.woffid.pat.lab" and contains the following options:

- ☒ Abrir ventanas emergentes
- ☐ Bloquear

Below the options, it says "Abrir 1 ventana emergente bloqueada...". The "Warning: An error occurred" dialog box is still visible over the "View password" button.
