

☐☐ To bear in mind

If you are working with Mozilla Firefox, it will be possible that this message will be displayed.
To solve it, you must allow the pop-up windows

The screenshot shows a Firefox browser window with the address bar displaying `https://demolab.woffid.pat.lab:8080/woffid/resource/account/vault.zul`. A notification bar at the top states: "Firefox ha impedido que este sitio abriera una ventana emergente. Preferencias". Below the notification bar is the "woffid" logo and a search bar. The main content area shows a breadcrumb trail: "Main Menu > Administration > Resources > Password vault" with a pagination indicator "8 / 10". Under the "Actions" tab, there is a table with the following data:

Name :	9
Description :	MV - pgarcia - Ubuntu 2 --> Connect
System :	SSO - External SSO accounts
Login name :	pgarcia
Login url :	ssh://192.168.122.167
In use by :	

Below the table, there is a "Warning: An error occurred" dialog box with the message "Failed to process script" and a "close" button. The dialog box is positioned over a process flow diagram with steps: "Launch", "View password", and "Set now".

The screenshot shows the same Firefox browser window as above, but with a permission dialog box open. The dialog box is titled "Permisos para demolab.woffid.pat.lab" and contains the following text:

Abrir ventanas emergentes Bloquear

Abrir 1 ventana emergente bloqueada...

The dialog box is positioned over the same process flow diagram as in the previous screenshot. The "Warning: An error occurred" dialog box is still visible, showing the message "Failed to process script" and a "close" button.
