

Configure Default questions

Description

Soffid allows to the administrator user, o the user with the proper roles, to configure the default questions that will be displayed to the end-users. Those questions will be the default questions, the end-users could change them and configure other questions.

To config the question&answer recovery, the administrator-user needs to configure some parameters at the "Password recovery questions" tab:

- Enable question&answer recovery
- Minimum number of filled-in questions
- Questions to answer to unlock
- Number to answer to unlock

Once, question&answer recovery parameters are configured, the end-users must complete the answers in the Self-service portal in order to user the recover password method when it will be necessary.

Screen Overview
