

# How to install Recertification addon in Soffid

## Installation

### Introduction

To use an addon in Soffid, you must download and install it in the Console. There are two ways to do this.

1. The first option is to use the **Soffid 4 marketplace**. You can download and upload it directly from the [Licence and plugin](#) page.
2. The second option is to download the file from the Soffid **download** page and then **upload** it to the Console.

### Soffid 4 marketplace

Soffid 4 allows you to install and update plugins through the new Addons marketplace feature.

To access the marketplace, you must have a valid token to use Soffid and have configured the Console via https. Please check the [License and plugin](#) page.

1. Please **log in** to IAM Console.

You need to be an **administrator** user of the Soffid console or a user with permission to upload addons.

It is recommended to upload the addons to the **master**, this is the way to maintain updated all, master and tenants if there are.

2. In the Soffid console, please **go to** the License and plugin page.

Main Menu > Configuration > Global Settings > License and plugin

3. Then, click the add button "**Add new**" button, open the "Soffid Addons" section and select the "Instlla addon" option, Soffid will upload the addon file.

4. Finally, when the addon is installed, the Consola has to be **restarted**, a popup will be displayed to perform this action, you can choose to do it now or later.

5. Once the Soffid console has restarted, you can **check** if the plugin was correctly uploaded on the "License and plugins" page.

Main Menu > Configuration > Global Settings > License and plugin

6. Now, you can **configure** the addon.

## Download an upload

1. You could **download** the addon at the following link

<http://www.soffid.com/download/enterprise/> if you have a Soffid user with authorization, or in the following <http://download.soffid.com/download/> by registering.

The addons are in the Addon section.

2. Once the addon is downloaded, please **log in** to IAM Console.

You need to be an **administrator** user of the Soffid console or a user with permission to upload addons.

It is recommended to upload the addons to the **master**, this is the way to maintain updated all, master and tenants if there are.

3. In the Soffid console, please **go to** the [License and plugin](#) page.

Soffid 3:

Main Menu > Administration > Configuration > Global Settings > Plugins

Soffid 4:

Main Menu > Configuration > Global Settings > License and plugin

4. Then, click the add button "**Upload**" and pick the file and click the "Select" button and Soffid will upload the addon file.

The screenshot shows the Soffid web interface. The left sidebar contains navigation options: ISS, ICA, AM, PAM, IRC, and a 'Monitoring and reporting' section. The main content area is titled 'License and plugin' and shows a 'License valid until 14/07/2026' status. Below this, there is a table of installed plugins. The 'Upload' button is highlighted with a red box. An 'Open File' dialog box is open, showing a file explorer view with a list of files in the 'addons' directory.

| Plugin                   | Version | Deployed by | Date             |
|--------------------------|---------|-------------|------------------|
| Default plugin           | 4.0.11  |             | 10/12/2025 14:35 |
| External accounts plugin | 4.0.0   |             | 11/08/2025 18:11 |
| LDAP plugin              | 4.0.0   | svives      | 26/11/2025 18:32 |
| Mariadb & Mysql plugin   | 4.0.0   | admin       | 27/10/2025 15:25 |
| Oracle plugin            | 4.0.2   | svives      | 25/11/2025 18:21 |
| REST Web service plugin  | 4.0.0   | admin       | 04/10/2025 17:47 |
| SAP plugin               | 4.0.0   | admin       | 23/12/2025 15:34 |

| Name                   | Size     | Type    | Modified |
|------------------------|----------|---------|----------|
| admin-addon-4.0.0.jar  | 293,1 kB | Archive | 7 ago    |
| admin-addon-4.0.2.jar  | 305,5 kB | Archive | 3 nov    |
| admin-addon-4.0.3.jar  | 306,2 kB | Archive | 11 dic   |
| backup-addon-4.0.2.jar | 124,3 kB | Archive | 3 nov    |
| bpm-addon-4.0.1.jar    | 729,5 kB | Archive | 11 jul   |
| bpm-addon-4.0.3.jar    | 731,7 kB | Archive | 5 ago    |

5. Finally, when the addon is installed, the Consola has to be **restarted**, a popup will be displayed to perform this action, you can choose to do it now or later.

## Image

**6.** Once the Soffid console has restarted, you can **check** if the plugin was correctly uploaded on the "License and plugins" page.

Main Menu > Configuration > Global Settings > License and plugin

**7.** Now, you can **configure** the addon.
