

Recertification policies

Description

Soffid allows you to establish some policies to define the scope of the recertification process.

Menu option

Main Menu > Administration > Configuration > Security settings > Recertification policies

Screen overview

[Main Menu](#) > [Administration](#) > [Configuration](#) > [Security settings](#) > [Recertification policies](#) ◀ 7 / 7

Name :	<input type="text" value="sharedAccountEntitlements"/>
Type :	<input type="text" value="Shared account entitlements"/>
Filter :	<input type="text" value="Filter"/>
Step 1 expression :	<pre>account = serviceLocator.getAccountService().findAccountById(grant.accountId); StringBuffer sb = new StringBuffer(); for (owner : account.ownerUsers) { if (sb.length() > 0) </pre>
Step 2 expression :	<pre>account = serviceLocator.getAccountService().findAccountById(grant.accountId); StringBuffer sb = new StringBuffer(); for (owner : account.ownerUsers) { if (sb.length() > 0) sb.append(" "); </pre>
Step 3 expression :	<input type="text" value="Step 3 expression"/>
Step 4 expression :	<input type="text" value="Step 4 expression"/>
Mail template :	<p>Dear \${fullName}</p> <p>Follow this link to complete the review process</p>

Custom attributes

- **Name:** name to identify the policy
- **Type:** list of available recertification types.
 - **User entitlements:** the recertification process will be conducted to review user access rights.
 - **Role definitions:** the recertification process will be conducted to review the relationship between roles.

- **Share account entitlements:** the recertification process will be conducted to review access rights to shared accounts.
- **Filter:** this allows you to define a script to identify the grant list to which to apply the recertification process. The **grant object** (*1) is always available. You can use the Enumeration SoDRisk to compare:
 - **SOD_LOW**
 - **SOD_HIGH**
 - **SOD_FORBIDDEN**
 - **SOD_NA**
- **Step 1 expression:** this allows you to define a script to determine who is or are in charge to approve or deny the recertification process in the first level.
- **Step 2 expression:** this allows you to define a script to determine who is or are in charge to approve or deny the recertification process after the first level of approval.
- **Step 3 expression:** this allows you to define a script to determine who is or are in charge to approve or deny the recertification process after the second level of approval.
- **Step 4 expression:** this allows you to define a script to determine who is or are in charge to approve or deny the recertification process after the third level of approval.
- **Mail Template:** this allows you to define a template to send an email to the people in charge to approve or deny. Be in mind, that to work fine, the review process link must be `${url}`

(*1) **grant object** is a [com.soffid.iam.api.RoleAccount object](#).

Examples

Some sample scripts for the filters and approval steps are shown below

Filter

Return all grants with risk.

```
return grant.sodRisk != null
return grant.sodRisk != es.caib.seycon.ng.comu.SoDRisk.SOD_NA;
```

Steps

```
account = serviceLocator.getAccountService().findAccountById(grant.accountId);
StringBuffer sb = new StringBuffer();
```

```
for (owner : account.ownerUsers) {
    if (sb.length() > 0)
        sb.append(" ");

    sb.append(owner);
}

if (sb.length() > 0)
    return sb.toString();
else
    return "admin";
```

```
com.soffid.iam.api.Role role =
serviceLocator.getApplicationService().findRoleByNameAndSystem(grant.roleName, grant.system);

StringBuffer sb = new StringBuffer();

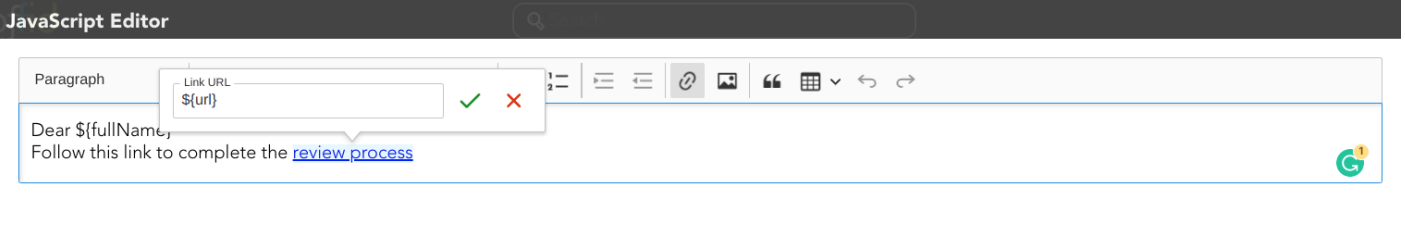

List owners = role.getAttributes().get("owner");

if (owners != null) {
    for (owner : account.ownerUsers) {
        if (sb.length() > 0)
            sb.append(" ");

        sb.append(owner);
    }
}

if (sb.length() == 0)
    return "admin";
else
    return sb.toString();
```

Mail template

Actions

Recertification policies query

Add new	Allows you to add a new Recertification policy. You can choose that option on the hamburger menu or click the add button (+). To add a new it is necessary to fill in the required fields.
Delete	Allows you to remove one or more Recertification policies by selecting one or more records and next clicking the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.
Import	Allows you to upload a CSV file with the Recertification policies to add or update the attribute definition to Soffid. First, you need to pick up a CSV file, that CSV has to contain a specific configuration. Then you need to check the content to be loaded, it is allowed to choose if you want or not to load a specific attribute. And finally, you need to select the mappings for each column of the CSV file to import the data correctly and click the Import button.
Download CSV file	Allows you to download a CSV file with the basic information of all Recertification policies.
Add or remove columns	Allows you to show and hide columns in the table. You can also set the order in which the columns will be displayed. The selected columns and order will be saved for the next time Soffid displays the page to the user.

Recertification policies details

Apply changes	Allows you to save the data of a new policy or to update the data of a specific policy and quit . To save the data it will be mandatory to fill in the required fields.
Save	Allows you to save the data of a new policy or to update the data of a specific policy. To save the data it will be mandatory to fill in the required fields.
Delete	Allows you to remove a specific policy. You can choose that option on the hamburger icon. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.
Undo	Allows you to quit without applying any changes.
