
Console Version 3.6.x

Console version 3.6.37

Check [Console version 3.6.32 Release notes](#)

NTLM authentication for SQL Server

In case of an upgrade with SQL Server, the service must be uninstalled and reinstalled.

If you need to uninstall Sync Server in a Windows installation, you also need to remove the Sync Server Service. To remove the **Sync Server Service**, will be mandatory run the **service.remove.as.admin** script.

You can find this file in the path \Program Files\Soffid\IAM-Sync\bin

Fix SAML login

Fixed a bug concerning login using SAML.

Upgrade maven image

The maven image in the project has been updated.

Console version 3.6.32

Require authorization to use pam service

Before upgrading the Soffid Console to this version, **it will be necessary to grant authorization to use the PAM service** "pamSession:create : Create a jump server session". If you upgrade Soffid Console without this step, you will lose permission to use the PAM service.

Use proper HQL syntax

role:create, role:update and role:delete permissions should have APPLICATIONS domain
