

# Resource data model & schema

The data model of the Soffid objects is mapped to JSON objects to enable the data transport between client and server.

# User resource

## /User

## Dictionary table

The diagram service model of the object:

<https://download.soffid.com/doc/console/latest/uml/com/soffid/iam/api/User.html>

Soffid allows you to add customized data to the user object. You can do that on metadata, on the proper object.

Main Menu > Administration > Configure Soffid > Global Settings > Metadata

## Query schema

It is allowed to consult all the User definition using the Schema query:
