

# Textual Index

- Textual Index
- Operation

# Textual Index

## Introduction

A textual index is a data structure used in database systems to facilitate efficient search and retrieval of text-based information. It is designed to handle large volumes of textual data and provide quick access to relevant documents or records based on specified search criteria.

When a search query is performed on a database with a textual index, the index is queried to identify relevant documents or records that match the search terms. The index provides information about the location and relevance of the documents, which enables the database system to retrieve and present the results in a timely manner.

Textual indexes play a crucial role in enabling efficient search and retrieval of textual information in databases, making them an essential component in applications that handle large volumes of textual data, such as search engines, content management systems, and document repositories.

Soffid incorporates the textual index from version 3.5 using [the Apache Lucene library](#).

## Index configuration

Soffid allows you to configure the objects you want to use in the textual index. To do this, you must select the proper object from the metadata page and enable the option "Use textual index". Once you enable this option, the textual index will be applied to the attributes of this object that have been included in the quick search.

Notice, from the user interface, it is not interpreted as a Lucene expression.

## Example

1. Enable the "Use textual index" on the User object and save the changes.

soffid

Search

Main Menu > Administration > Configuration > Global Settings > Metadata 9 / 12

Object type : com.soffid.iam.api.User

Description : Builtin user object

Use textual index : Yes III

Code	Label	Data type	Built-in type
Filter	Filter	Filter	Filter
__COMMONATTRIBUTES__	Common attributes	Separator	Yes
userName	User name	String	Yes
firstName	First name	String	Yes
lastName	Last Name	String	Yes
middleName	Middle name	String	Yes

## 2. Check the attributes included in the quick search.

soffid

Main Menu > Administration > Configuration > Global Settings > Metadata 2 / 31

Attribute metadata

Code : userName

Label : User name

Data type : String

Letter case : Keep as entered by the user

User hint : User hint

Description : Description

Required : Yes II

Include in quick search : Yes II

Prevent duplicated values : II No

Multiple values : II No

Maximum number of rows to display : Maximum number of rows to display

# How does the user interface search work?

Once you have configured the textual index for a specific object, Soffid will apply it when you use Quick Search on this object.

## Example 1

1. If you search for users using the text "frankin", then Soffid will display all the users whose userName, firstName, lastName, or middleName match, to some degree, with the typed text following the textual index rules.

soffid

Search

?

⚙

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

frankin

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ First name	↕ Last Name	↕ Primary group	↕ Enabled	↕ Manager
<input type="checkbox"/>	aretha	Aretha	Franklin	world	Yes	
<input type="checkbox"/>	frank	Frank	Sinatra	Music	Yes	
<input type="checkbox"/>	frankrudolph	Frank Rudolph	Olson	scientist	Yes	
<input type="checkbox"/>	franks	Frank	Sherwood	scientist	Yes	
<input type="checkbox"/>	rfranklin	Rosalind	Franklin	scientist	Yes	

Displayed rows: 5

2. If you include the attribute manager in the quick search:

soffid

Attribute metadata

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

Object type :

Description :

Use textual index :

Code

Filter

☐ rid
 ☐ fullName
 ☐ birthDate
 ☐ picture
 ☐ \_\_ORGANIZATION
 ☐ userType

Attribute metadata

◀ 15 / 32 ▶

Code :

manager

Label :

Manager

Data type :

User

User hint :

User hint

Description :

Description

Required :

☐ Yes
 ☐ No

Include in quick search :

☒ Yes
 ☐ No

Prevent duplicated values :

☐ Yes
 ☐ No

Multiple values :

☐ Yes
 ☐ No

Maximum number of rows to display :

3. And search for "frankin", then Soffid will display all the users whose userName, firstName, lastName, middleName, or manager match with the typed text following the textual index rules.

soffid

Search

?

⚙

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

frankin

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ First name	↕ Last Name	↕ Primary group	↕ Enabled	↕ Manager
<input type="checkbox"/>	aretha	Aretha	Franklin	world	Yes	
<input type="checkbox"/>	frank	Frank	Sinatra	Music	Yes	
<input type="checkbox"/>	frankrudolph	Frank Rudolph	Olson	scientist	Yes	
<input type="checkbox"/>	franks	Frank	Sherwood	scientist	Yes	
<input type="checkbox"/>	hlamarr	Hedy	Lamarr	scientist	Yes	franks
<input type="checkbox"/>	inewton	Isaac	Newton	scientist	Yes	frank
<input type="checkbox"/>	janis	Janis	Joplin	Music	Yes	frank
<input type="checkbox"/>	rfranklin	Rosalind	Franklin	scientist	Yes	

Displayed rows: 8

## Example 2

1. If you search for users using the text "manager:frank" Soffid will display all users whose manager matches the text "frank".

soffid

Search

?

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

manager:frank

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	hlamarr	Hedy Lamarr	scientist	Yes	Hedy	Lamarr	franks
<input type="checkbox"/>	inewton	Isaac Newton	scientist	Yes	Isaac	Newton	frank
<input type="checkbox"/>	janis	Janis Joplin	Music	Yes	Janis	Joplin	frank
<input type="checkbox"/>	ntesla	Nikola Tesla	Support IT	Yes	Nikola	Tesla	frankrudolph

Displayed rows: 4

Notice the difference by searching "manager:frank?":

soffid

Search

?

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

manager:frank?

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	hlamarr	Hedy Lamarr	scientist	Yes	Hedy	Lamarr	franks
<input type="checkbox"/>	ntesla	Nikola Tesla	Support IT	Yes	Nikola	Tesla	frankrudolph

Displayed rows: 2

And by searching "manager:frank\*":

soffid

Search

?

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

manager:frank\*

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	hlamarr	Hedy Lamarr	scientist	Yes	Hedy	Lamarr	franks
<input type="checkbox"/>	inewton	Isaac Newton	scientist	Yes	Isaac	Newton	frank
<input type="checkbox"/>	janis	Janis Joplin	Music	Yes	Janis	Joplin	frank
<input type="checkbox"/>	ntesla	Nikola Tesla	Support IT	Yes	Nikola	Tesla	frankrudolph

Displayed rows: 4

And also by searching "manager:fr\*":

soffid

Search

?

[Main Menu](#) > [Administration](#) > [Resources](#) > [Users](#)

manager:fr\*

Quick Basic Advanced

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	etaylor	Elizabeth Taylor	Movie Stars	Yes	Elizabeth	Taylor	freddie
<input type="checkbox"/>	hlamarr	Hedy Lamarr	scientist	Yes	Hedy	Lamarr	franks
<input type="checkbox"/>	inewton	Isaac Newton	scientist	Yes	Isaac	Newton	frank
<input type="checkbox"/>	janis	Janis Joplin	Music	Yes	Janis	Joplin	frank
<input type="checkbox"/>	ntesla	Nikola Tesla	Support IT	Yes	Nikola	Tesla	frankrudolph

Displayed rows: 5

## Example 3

**1.** If you search for users using the text "userName:frank\*" Soffid will display all users whose user name matches the text "frank" followed by any other text.

soffid

Search

?

Main Menu > Administration > Resources > Users

userName:frank\*

[Quick](#) [Basic](#) [Advanced](#)

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	frank	Frank Sinatra	Music	Yes	Frank	Sinatra	
<input type="checkbox"/>	frankrudolph	Frank Rudolph Olson	scientist	Yes	Frank Rudolph	Olson	
<input type="checkbox"/>	franks	Frank Sherwood	scientist	Yes	Frank	Sherwood	

Displayed rows: 3

Notice the difference by searching the text "userName:frank?":

soffid

Search

?

Main Menu > Administration > Resources > Users

userName:frank?

[Quick](#) [Basic](#) [Advanced](#)

<input type="checkbox"/>	▼ User name	↕ Full name	↕ Primary group	↕ Enabled	↕ First name	↕ Last Name	↕ Manager
<input type="checkbox"/>	frankrudolph	Frank Rudolph Olson	scientist	Yes	Frank Rudolph	Olson	
<input type="checkbox"/>	franks	Frank Sherwood	scientist	Yes	Frank	Sherwood	

Displayed rows: 2

## Example 4

1. If you search for users using the text "frank" plus the wildcard "?", Soffid will display all users whose userName, firstName, lastName, middleName, or manager match the typed text as long as it has variation in the characters where the wildcard has been used.

soffid

Search

?

Main Menu > Administration > Resources > Users

frank?

[Quick](#) [Basic](#) [Advanced](#)

<input type="checkbox"/>	▼ User name	↕ First name	↕ Last Name	↕ Primary group	↕ Enabled	↕ Manager
<input type="checkbox"/>	aretha	Aretha	Franklin	world	Yes	
<input type="checkbox"/>	frankrudolph	Frank Rudolph	Olson	scientist	Yes	
<input type="checkbox"/>	franks	Frank	Sherwood	scientist	Yes	
<input type="checkbox"/>	hlamarr	Hedy	Lamarr	scientist	Yes	franks
<input type="checkbox"/>	ntesla	Nikola	Tesla	Support IT	Yes	frankrudolph
<input type="checkbox"/>	rfranklin	Rosalind	Franklin	scientist	Yes	

Displayed rows: 6

Notice the difference by searching "fran?"

soffid

Search

?

Main Menu > Administration > Resources > Users

fran?

[Quick](#) [Basic](#) [Advanced](#)

<input type="checkbox"/>	▼ User name	↕ First name	↕ Last Name	↕ Primary group	↕ Enabled	↕ Manager
<input type="checkbox"/>	aretha	Aretha	Franklin	world	Yes	
<input type="checkbox"/>	frank	Frank	Sinatra	Music	Yes	
<input type="checkbox"/>	frankrudolph	Frank Rudolph	Olson	scientist	Yes	
<input type="checkbox"/>	franks	Frank	Sherwood	scientist	Yes	
<input type="checkbox"/>	hlamarr	Hedy	Lamarr	scientist	Yes	franks
<input type="checkbox"/>	inewton	Isaac	Newton	scientist	Yes	frank
<input type="checkbox"/>	janis	Janis	Joplin	Music	Yes	frank
<input type="checkbox"/>	ntesla	Nikola	Tesla	Support IT	Yes	frankrudolph
<input type="checkbox"/>	rfranklin	Rosalind	Franklin	scientist	Yes	

Displayed rows: 9

# How does the SCIM interface search work?

1. First of all, you must install the SCIM addon in Soffid.

For more information, you can visit [the How to install SCIM in Soffid? page](#).

2. Then, you can use any REST client to test and consume our SCIM REST web service.

For more information, you can visit [the Testing tool page](#).

3. Finally, you can start to use the SCIM interface search by using Lucene syntaxis

## Lucene syntaxis

Please browse the standard specifications in this link:

<https://bookstack.soffid.com/books/soffid-3-reference-guide/page/lucene-query-parser-syntax>

## Term Modifiers

Lucene supports modifying query terms to provide a wide range of search options. Here are the most common ones:

<b>Wildcard Searches</b>	To perform a single character wildcard search use the "?" symbol. To perform a multiple character wildcard search use the "*" symbol.
<b>Regular Expression Searches</b>	Lucene supports regular expression searches matching a pattern between forward slashes "/"

<b>Fuzzy Searches</b>	<p>To do a fuzzy search use the tilde, "~", symbol at the end of a Single word Term</p> <p><u>Soffid Console &lt;= 3.4 version</u></p> <p>~0.8: stricter search</p> <p>~0.1: more lax search</p> <p><u>Soffid Console &gt; 3.4 version</u></p> <p>An additional (optional) parameter can specify the maximum number of edits allowed. The value is between 0 and 2.</p>
<b>Range Searches</b>	<p>Range Queries allow one to match documents whose field(s) values are between the lower and upper bound specified by the Range Query</p>
<b>Boosting a Term</b>	<p>To boost a term use the caret, "^", symbol with a boost factor (a number) at the end of the term you are searching. The higher the boost factor, the more relevant the term will be.</p>

## Boolean Operators

<b>OR</b>	The OR operator links two terms and finds a matching document if either of the terms exist in a document. This is equivalent to a union using sets
<b>AND</b>	The AND operator matches documents where both terms exist anywhere in the text of a single document. This is equivalent to an intersection using sets.
<b>+</b>	The "+" or required operator requires that the term after the "+" symbol exist somewhere in a the field of a single document.
<b>NOT</b>	The NOT operator excludes documents that contain the term after NOT. This is equivalent to a difference using sets.
<b>-</b>	The "-" or prohibit operator excludes documents that contain the term after the "-" symbol.

## Escaping Special Characters

Lucene supports escaping special characters that are part of the query syntax.

The current list of special characters are + - & || ! ( ) { } [ ] ^ " ~ \* ? : \ /

## Examples

### Example 1

1. Use the wildcard search

## 1.1.\*

### Request

```
GET http://<domain>/webservice/scim2/v1/User?textFilter=fran*
```

### Response 200 OK

# Operation

## Operation

The Lucene index information is stored in files arranged in a folder structure. This folder structure is replicated in every Soffid Console and every Sync Server and also is saved in the database.

In case an instance (Docker, Kubernetes, or stand-alone) detects an inconsistency, the information will be overwritten with the database data.

When you update an object, marked as the textual index, a task will be created. The **soffid agent** will execute this task and the Sync Server will update the database tables related to the textual index.

## Folder structure

The folder structure is the following:

- `../index/<TENANT>/<SOFFID_OBJECT>`

## Example

1. Here you are the folder structure for the Soffid Console

```
root@da8136799e55:/opt/soffid/iam-console-3/index/master# ll
total 16
drwxr-x--- 4 root root 4096 Jun  2 09:58 ./
drwxr-x--- 3 root root 4096 Jun  2 08:53 ../
drwxr-x--- 2 root root 4096 Jun  2 09:58 com.soffid.iam.api.Group/
drwxr-x--- 2 root root 4096 Jun  2 10:45 com.soffid.iam.api.User/
root@da8136799e55:/opt/soffid/iam-console-3/index/master#
```

```
root@da8136799e55:/opt/soffid/iam-console-3/index/master# cd com.soffid.iam.api.Group/
root@da8136799e55:/opt/soffid/iam-console-3/index/master/com.soffid.iam.api.Group# ls
_1f.fdm  _1f.kdi      _1f_Lucene90_0.tim  _1p.fdt  _1p.kdm      _1p_Lucene90_0.tip  _1q.si  _1s.cfs
_1f.fdt  _1f.kdm      _1f_Lucene90_0.tip  _1p.fdx  _1p_Lucene90_0.doc  _1p_Lucene90_0.tmd  _1r.cfe  _1s.si

***** 3. row *****
LIP_ID: 5381
```

## soffid agent

You can check the soffid agent status by visiting the Sync Server monitoring page:

Main Menu > Administration > Monitoring and reporting > Sync server monitoring

# Example

## 1. A soffid agent pending task:

The screenshot shows the soffid interface with a modal window displaying details for a pending task. The modal has a sidebar on the left with 'Agent', 'Filter', 'soffid', and 'SSO' options. The main content area shows the agent's name, URL, and version. Below this is a table with columns for Task, Priority, Executions, Execution time, Message, and Scheduled. The table contains one row with the task 'IndexObject com.soffid.iam.api.User 3864' and a priority of 1. The modal also includes a 'Close' button and a 'Displayed rows: 1' indicator.

Task	Priority	Executions	Execution time	Message	Scheduled
IndexObject com.soffid.iam.api.User 3864	1				

# Step-by-step

## Example 1

### 1. You update one user's data and save the changes.

The screenshot shows the soffid interface with the 'Users' page selected. The page has a sidebar on the left with 'Basic', 'Groups', 'Accounts', 'Roles', 'Effective Roles', 'Shared accounts', 'Sessions', and 'User processes' options. The main content area is divided into two sections: 'Common attributes' and 'Organization'. The 'Common attributes' section contains fields for User name, First name, Last Name, Middle name, Internal id, Full name, Birth Date, and Picture. The 'Organization' section contains fields for Type, Primary group, Home server, Profile server, and Manager. A blue arrow points to the 'Users' tab in the sidebar.

### 2. New tasks are created and executed.

The screenshot shows the soffid interface with a modal window displaying details for two tasks. The modal has a sidebar on the left with 'Agent', 'Filter', 'soffid', and 'SSO' options. The main content area shows the agent's name, URL, and version. Below this is a table with columns for Task, Priority, Executions, Execution time, Message, and Scheduled. The table contains two rows: 'IndexObject com.soffid.iam.api.User 3897' and 'UpdateUser ibergerman', both with a priority of 1. The modal also includes a 'Close' button and a 'Displayed rows: 2' indicator.

Task	Priority	Executions	Execution time	Message	Scheduled
IndexObject com.soffid.iam.api.User 3897	1				
UpdateUser ibergerman	1				

### 3. Then Sync Server indexes the updated text and places the index file.

```

```

4. Then Sync Server and updates the database table SC\_LUNIND by upgrading the LIP\_TIMSTA field of the User object or by creating a new record if it did not previously exist.

```

MariaDB [soffid_35x]> select * from SC_LUNIND;
+-----+-----+-----+-----+
| LIP_ID | LIP_NAME                                | LIP_TEN_ID | LIP_TIMSTA |
+-----+-----+-----+-----+
| 5378   | master/com.soffid.iam.api.User         | 1          | 1685711801976 |
| 5784   | master/com.soffid.iam.api.Group        | 1          | 1685703660618 |
+-----+-----+-----+-----+

```

5. When the following search will be performed, the very first thing to do is check the database file. If it is necessary update the file system and finally perform the search.

## Example 2

1. The task engine mode is Read only

soffid

Search

Main Menu > Administration > Configuration > Integration engine > Smart engine settings

Task engine mode: Read only (blue arrow)

Tasks limit per transaction: 15 (If a single transaction creates more than this number of tasks, tasks will be held until Soffid administrator releases them.)

Scripting language: Javascript

Undo Confirm changes

2. You update one user's data and save the changes.

soffid

Search

Main Menu > Administration > Resources > Users

Basics Groups Accounts Roles Effective Roles Shared accounts Sessions User processes

Common attributes

User name: ibergman

First name: agata (blue arrow)

Last Name: bergman

Middle name: Middle name

Internal id: Internal id

Full name: agata bergman

Birth Date: 12/15/1999

Picture: [Add icon]

Organization

Type: Internal user

Primary group: Movie Stars (Movie Stars icon)

Home server: Home server (Server icon)

Profile server: Profile server (Server icon)

Manager: rfranklin (Rosalind Franklin icon)

[Add new user button (blue arrow)]

3. A new task is created and executed
