

SCIM Federation Members examples

Operations

This page shows the functions that can be performed for the Federation Member object.

List all

Request

```
GET http://<your-domain>/soffid/webservice/scim2/v1/FederationMember
```

Response 200 OK

```

```

List by filter

List all entity groups with a filter expression.

It is allowed to use pagination and sort the information, for more information visit the [Sorting](#) and [Pagination](#) information.

Request

```
GET http://<your-domain>/soffid/webservice/scim2/v1/FederationMember?filter=name co "Dynamic"
```

Response 200 OK

```

Create (OpenID Dynamic Register)

The OpenID Dynamic Register has to be created in the Soffid console

For more information, you can visit [the Openid-connect Dynamic Register documentation](#)

Update partial

Only attributes with changes will be updated, the others will maintain the same value.

Request

```
PATCH http://<your-domain>/soffid/webservice/scim2/v1/FederationMember/6787388
```

JSON

```
{
  "Operations" : [
    {

```

Update all

This operation replaces all values in the entity group.

- Note that the attribute id is required to confirm that the resource "...EntityGroup/<id>" is the same that the JSON EntityGroup.
- Note that all the attributes not included in the request will be cleared in the EntityGroup and their data will be lost.
- Note that not all the attributes are updatable, for example, tag meta, avoid these tags.

For more information see the [Resource data model](#) page
