4. Select Create your own application

Microsoft Azure Search resources, services, and docs (G+/) Copilot

Home > Enterprise applications | All applications >

Browse Microsoft Entra Gallery

+ Create your own application | Got feedback?

The Microsoft Entra App Gallery is a catalog of thousands of apps that make it easy to deploy and configure single sign-on (SSO) and automated user provisioning. When deploying an app from the App Gallery, you leverage prebuilt templates to connect your users more securely to their apps. Browse or create your own application here. If you are wanting to publish an application you have developed into the Microsoft Entra Gallery for other organizations to discover and use, you can file a request using the process described in [this article](#).

Security

Activity

Single sign-on (SSO) adds security and convenience when users sign on to applications in Microsoft Entra ID by enabling a user in your organization to sign in to every application they use with only one account. Once the user logs into an application, that credential is used for all the other applications they need access to. [Learn more.](#)

Select a single sign-on method [Help me decide](#)

Disabled
Single sign-on is not enabled. The user won't be able to launch the app from My Apps.

1 SAML
Rich and secure authentication to applications using the SAML (Security Assertion Markup Language) protocol.

Password-based
Password storage and replay using a web browser extension or mobile app.

Linked
Link to an application in My Apps and/or Office 365 application launcher.

8. Enter the **Basic SAML Configuration** and Save:

- **Identifier:** https://<YOUR-SERVER>/soffid-iam-console

- **Reply URL:** https://<YOUR-SERVER>/soffid/saml/log/post
- **Sign on URL:** https://<YOUR-SERVER>/soffid/
- **Logout URL:** https://<YOUR-SERVER>/soffid/saml/slo/post

Set up Single Sign-On with SAML

An SSO implementation based on federation protocols improves security, reliability, and end user experiences and is easier to implement. Choose SAML single sign-on whenever possible for existing applications that do not use OpenID Connect or OAuth. [Learn more.](#)

Read the [configuration guide](#) for help integrating soffid.pat.lab.

1

Basic SAML Configuration

Identifier (Entity ID)	https://pat.soffid.lab:8443/soffid-iam-console
Reply URL (Assertion Consumer Service URL)	https://pat.soffid.lab:8443/soffid/saml/log/post
Sign on URL	https://pat.soffid.lab:8443/soffid/

Attributes & Claims

givenname	user.givenname
-----------	----------------

Edit

Basic SAML Configuration

Save | Got feedback?

Identifier (Entity ID) * ⓘ

The unique ID that identifies your application to Microsoft Entra ID. This value must be unique across all applications in your Microsoft Entra tenant. The default identifier will be the audience of the SAML response for IDP-initiated SSO.

	Default
<input type="text" value="https://pat.soffid.lab:8443/soffid-iam-console"/>	<input checked="" type="checkbox"/> ⓘ

[Add identifier](#)

Reply URL (Assertion Consumer Service URL) * ⓘ

The reply URL is where the application expects to receive the authentication token. This is also referred to as the "Assertion Consumer Service" (ACS) in SAML.

	Index	Default
<input type="text" value="https://pat.soffid.lab:8443/soffid/saml/log/post"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/> ⓘ

[Add reply URL](#)

Sign on URL (Optional)

Sign on URL is used if you would like to perform service provider-initiated single sign-on. This value is the sign-in page URL for your application. This field is unnecessary if you want to perform identity provider-initiated single sign-on.

<input type="text" value="https://pat.soffid.lab:8443/soffid/"/>	<input checked="" type="checkbox"/>
--	-------------------------------------

Relay State (Optional) ⓘ

The Relay State instructs the application where to redirect users after authentication is completed, and the value is typically a URI or URI path that takes users to a specific location within the application

9. Configure **Attributes & Claims** and change the attributes and claims to send the mailnickname as the user identifier (nameid)
