Download CSV file & Import

Download CSV file

Soffid allows you to download all data objects displayed in tables in a CSV file.

You can access to **Download CSV file** option through the hamburger icon from most of the components of the table type.

Import

Soffid allows you to upload a CSV file with the data list to add, update or delete information to the data table. The operations that can be performed with the data import depend on the table on which the process is being performed.

You can access to **Import** option through the hamburger icon from most of the components of the table type.

To import data from a CSV file, first of all it will be to pick the file to import. Once the file has been selected, the data will be displayed to check contents. If the content is correct, then it is allowed to set up the mappings for each CSV file column, "Don't load" option is available. Finally it is allowed to perform the import process.

When the import process finishes, Soffid will show a message with the result of the process execution.
