
Export settings and objects

Description

Soffid has the functionality that allows you to export configuration, Soffid objects, and objects from target systems in a ZIP file. Every object or configuration will be downloaded into the ZIP in a binary file. This ZIP file could be imported into another Soffid tenant to be used.

For more information, you can visit [the Import settings and objects page](#).

Once you open the **Export settings and objects**, you must select the configuration, objects, and target system objects you want to export. Then you only need to click the **Generate export file** button to download the ZIP that will contain all the previous information selected.

It is not allowed to export the basic configuration and configuration parameters of an agent for security reasons. You must create them manually and make sure you put the same names as in the source system if you are going to import accounts.

Overview

Select configuration to export

Metadata :	<input checked="" type="checkbox"/> No
Plugins :	<input checked="" type="checkbox"/> No
Business process definition :	<input checked="" type="checkbox"/> No
Custom scripts :	<input checked="" type="checkbox"/> No
User types :	<input checked="" type="checkbox"/> No
Group types :	<input checked="" type="checkbox"/> No
Account naming rules :	<input checked="" type="checkbox"/> No
Password policies :	<input checked="" type="checkbox"/> No
Mail Domains :	<input checked="" type="checkbox"/> No
Authorizations :	<input checked="" type="checkbox"/> No

Select target system objects to export

Accounts :	<input checked="" type="checkbox"/> No
Roles :	<input checked="" type="checkbox"/> No
Granted permissions :	<input checked="" type="checkbox"/> No
Attribute mapping :	<input checked="" type="checkbox"/> No
Systems:	

<input type="checkbox"/>	Name	Description
	<input type="text" value="Filter"/>	<input type="text" value="Filter"/>
<input type="checkbox"/>	AD_agent	Active Directory agent (anterior a 3.4)
<input type="checkbox"/>	AgentIdP	AgentIdP (anterior a 3.4)
<input type="checkbox"/>	Mariadb 172.20.0.6	Mariadb jdbc:mariadb://172.20.0.6:3306
<input type="checkbox"/>	soffid	Soffid system

Select the objects to export

Users :	<input checked="" type="checkbox"/> No
Information Systems :	<input checked="" type="checkbox"/> No
Groups :	<input checked="" type="checkbox"/> No
Hosts :	<input checked="" type="checkbox"/> No
Networks :	<input checked="" type="checkbox"/> No
Mail lists :	<input checked="" type="checkbox"/> No
Role assignment rules :	<input checked="" type="checkbox"/> No
Segregation of Duties :	<input checked="" type="checkbox"/> No
