Office 365 as External SAML identity provider

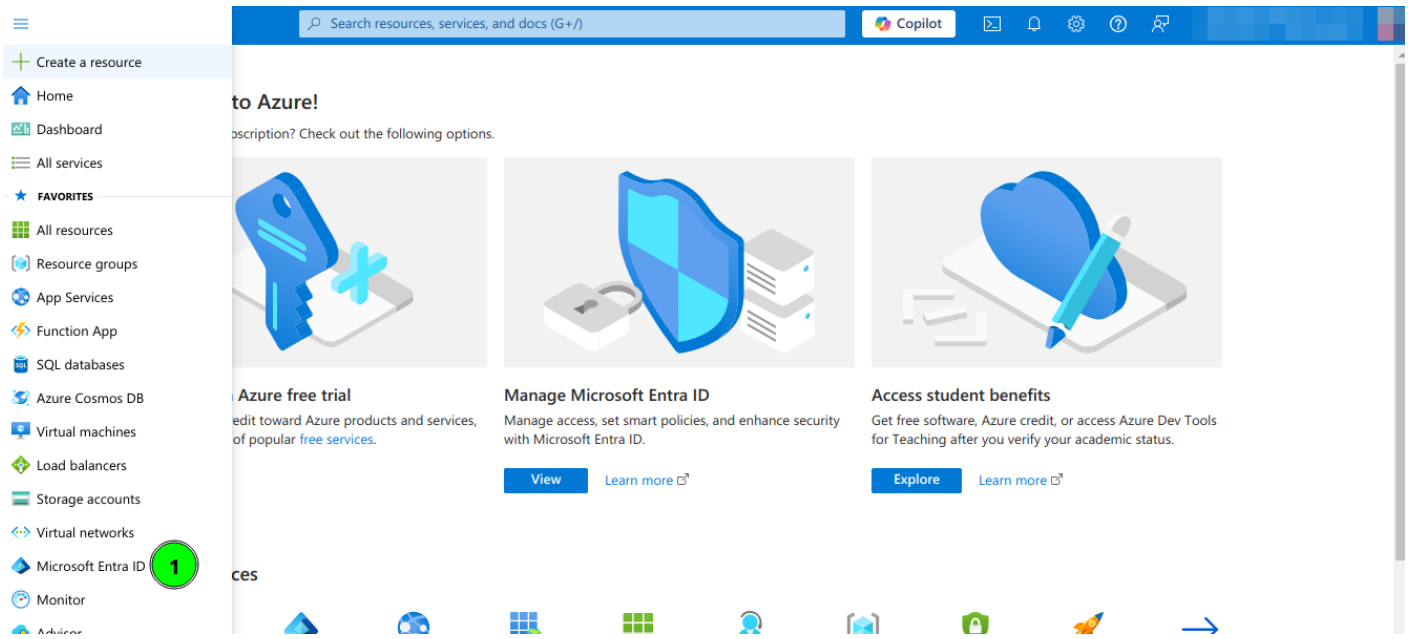

Introduction

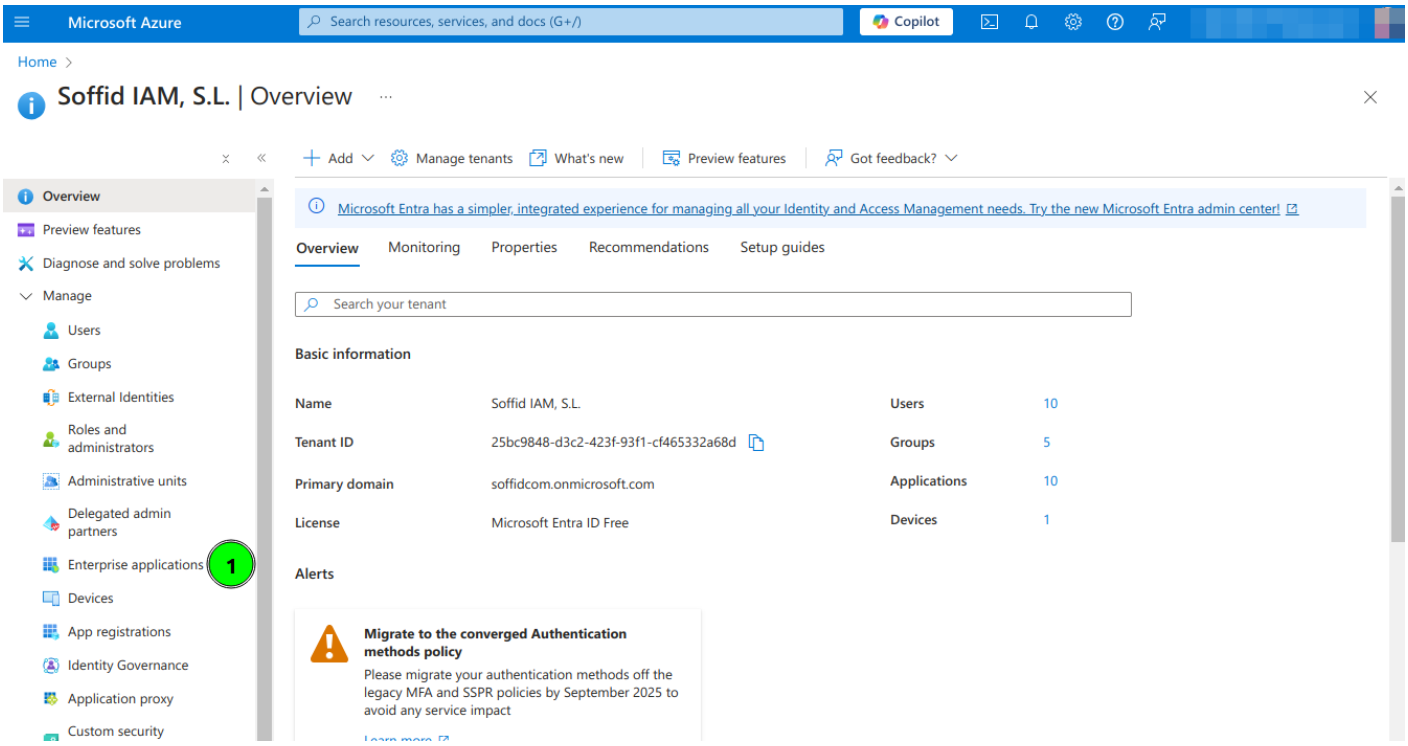

Steps to configure Office 365 as External SAML identity provider.

Step-by-Step

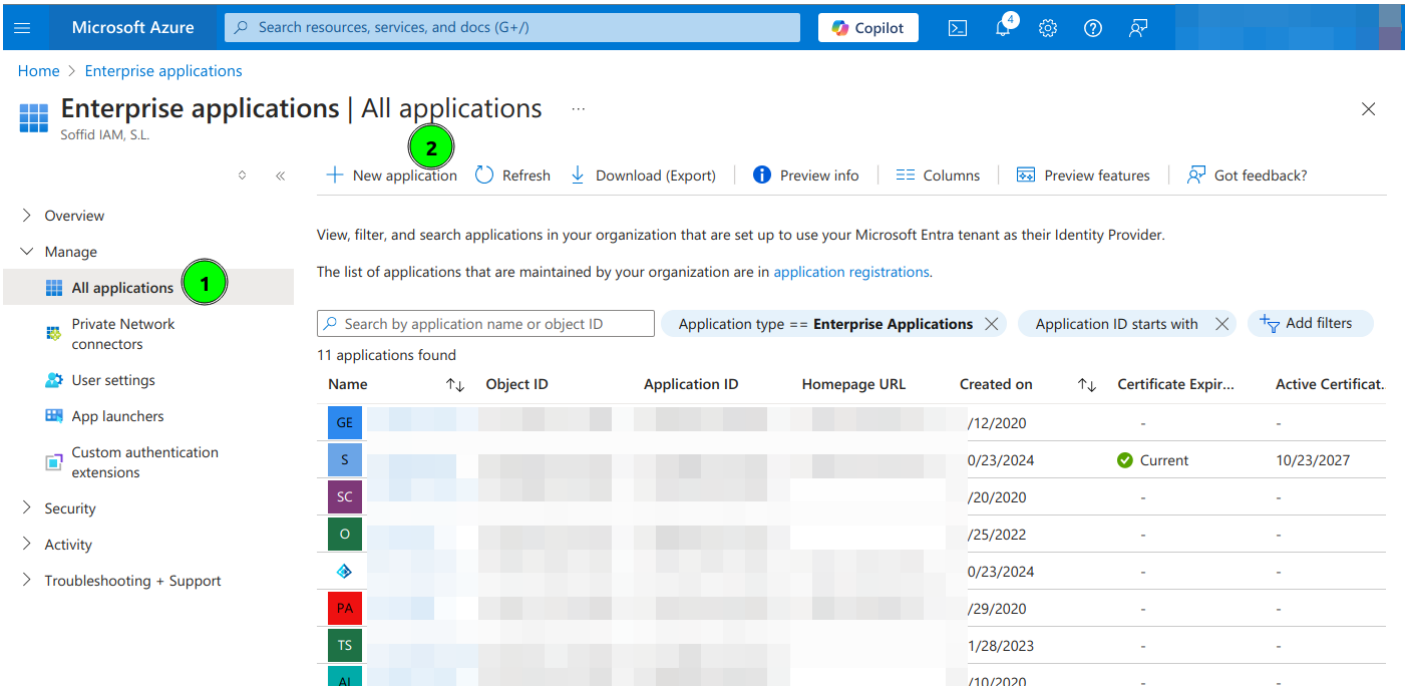

1. Open a https://portal.azure.com

2. Open **Microsoft Entra ID** and then select **Enterprise applications** option

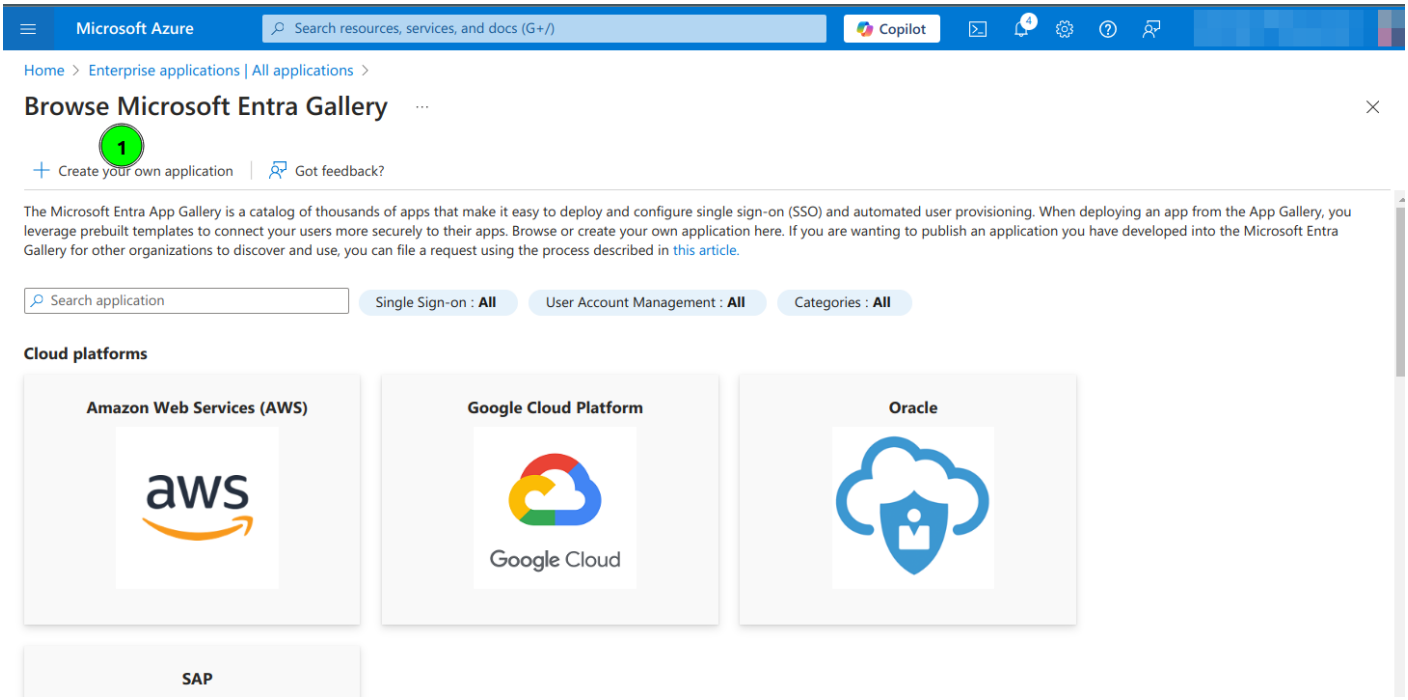

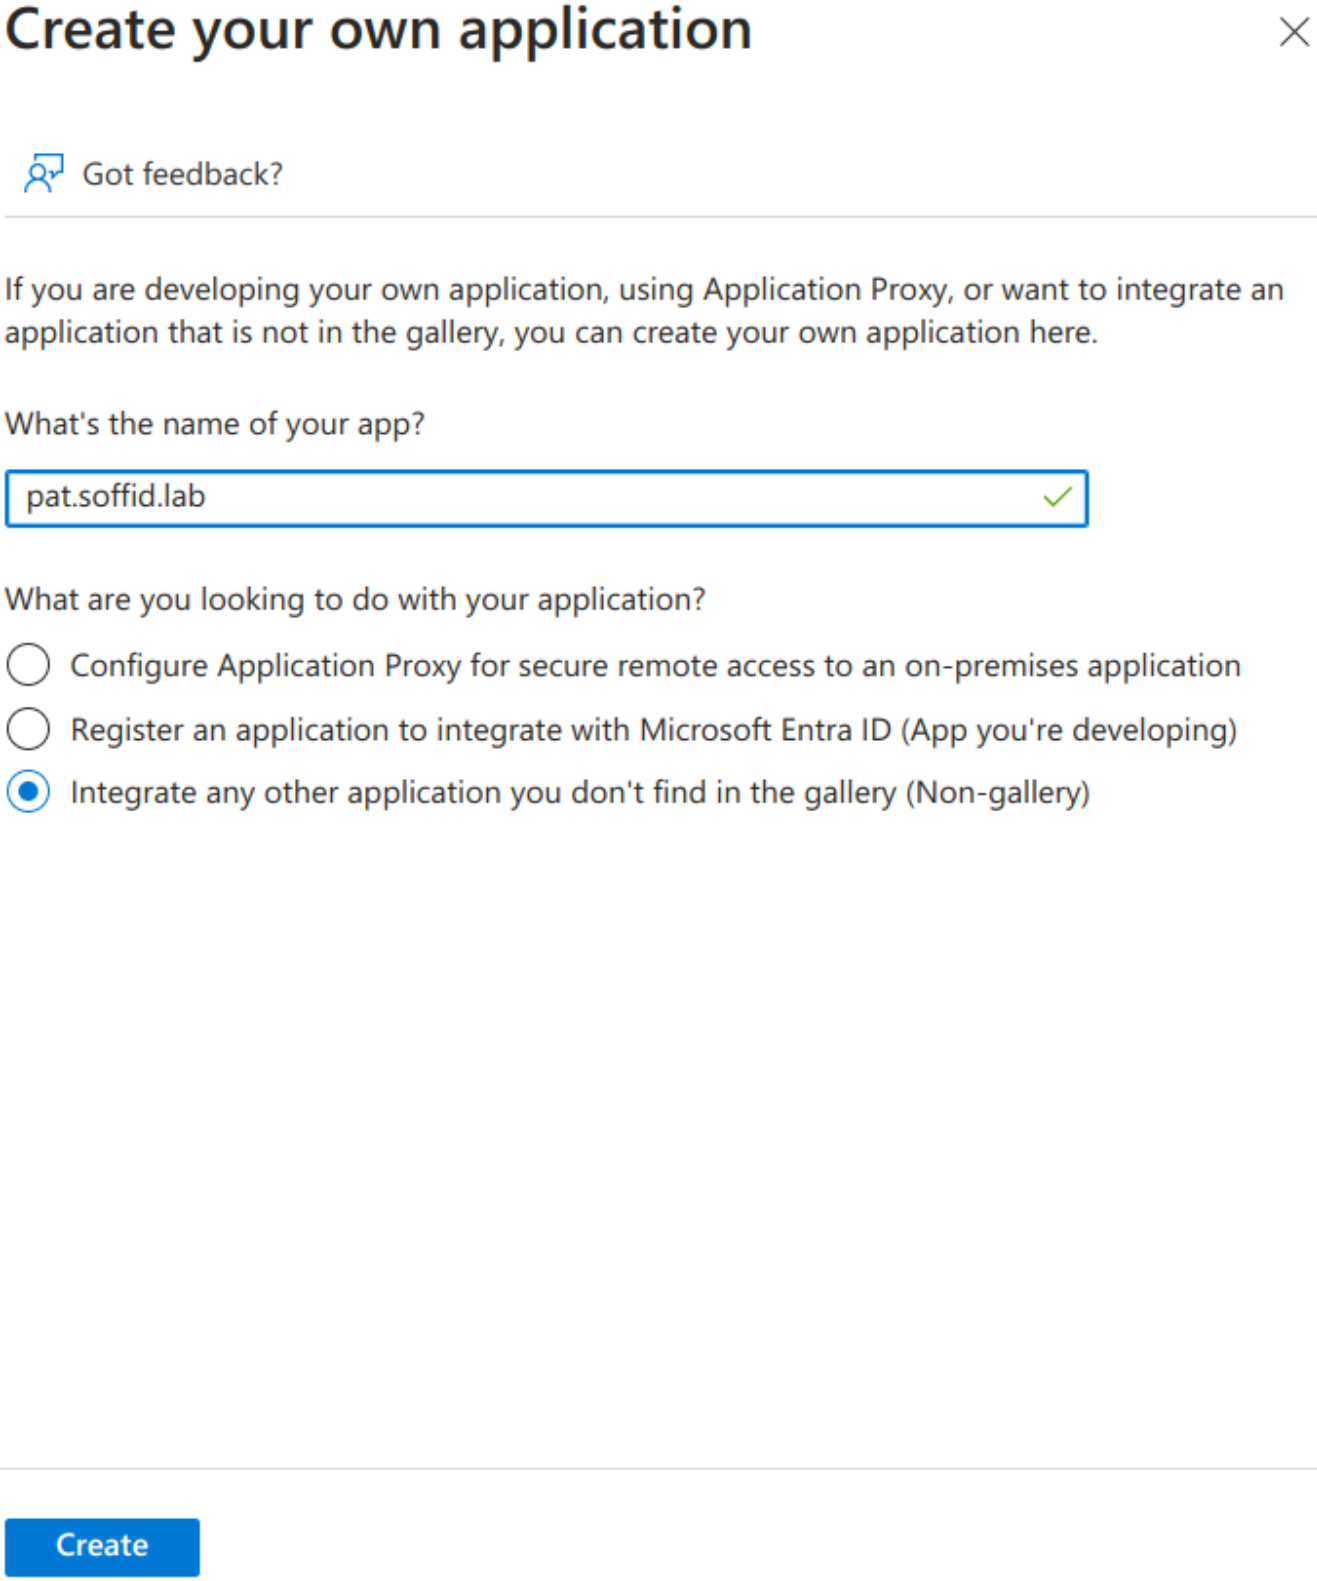

3. Select **All applications** and click **New Application**

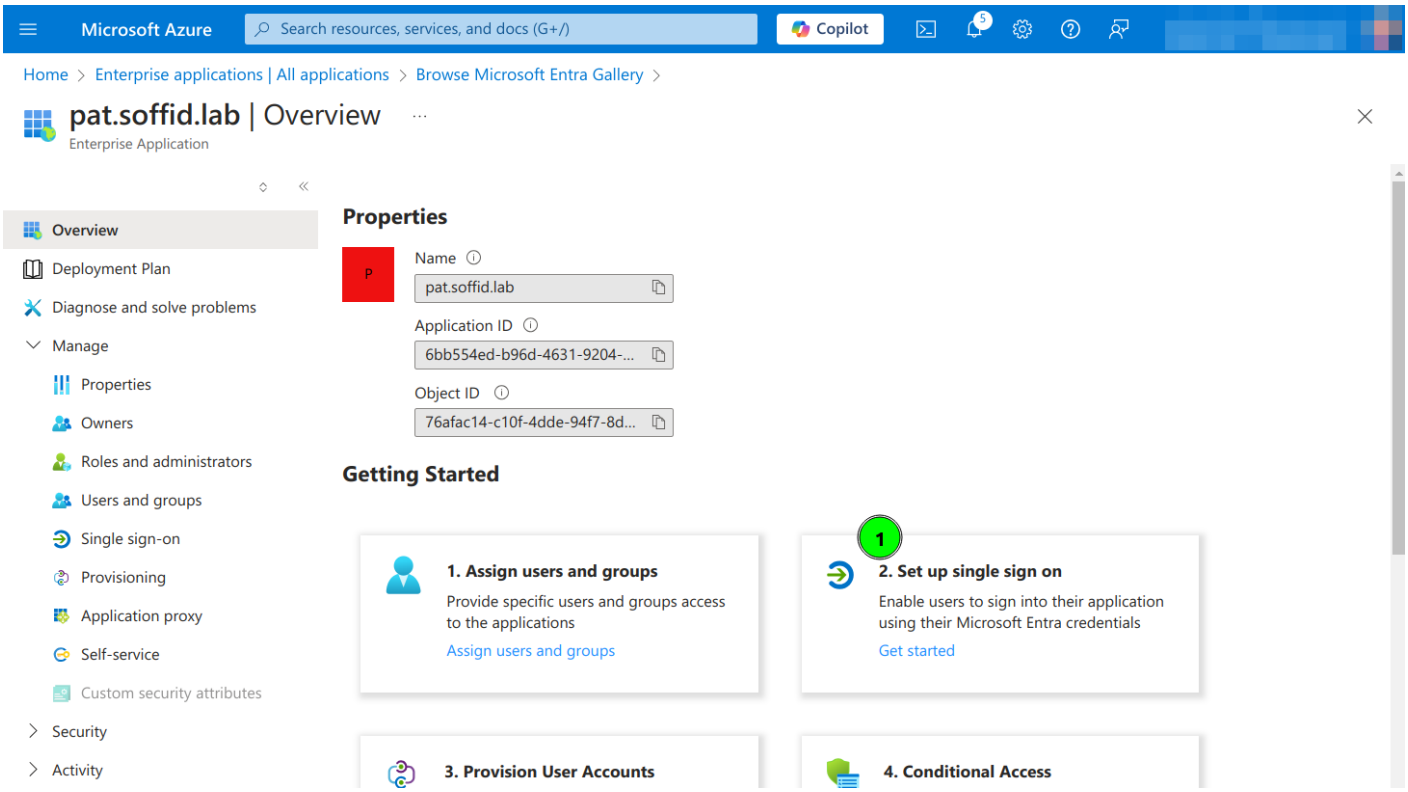

4. Select Create your own application

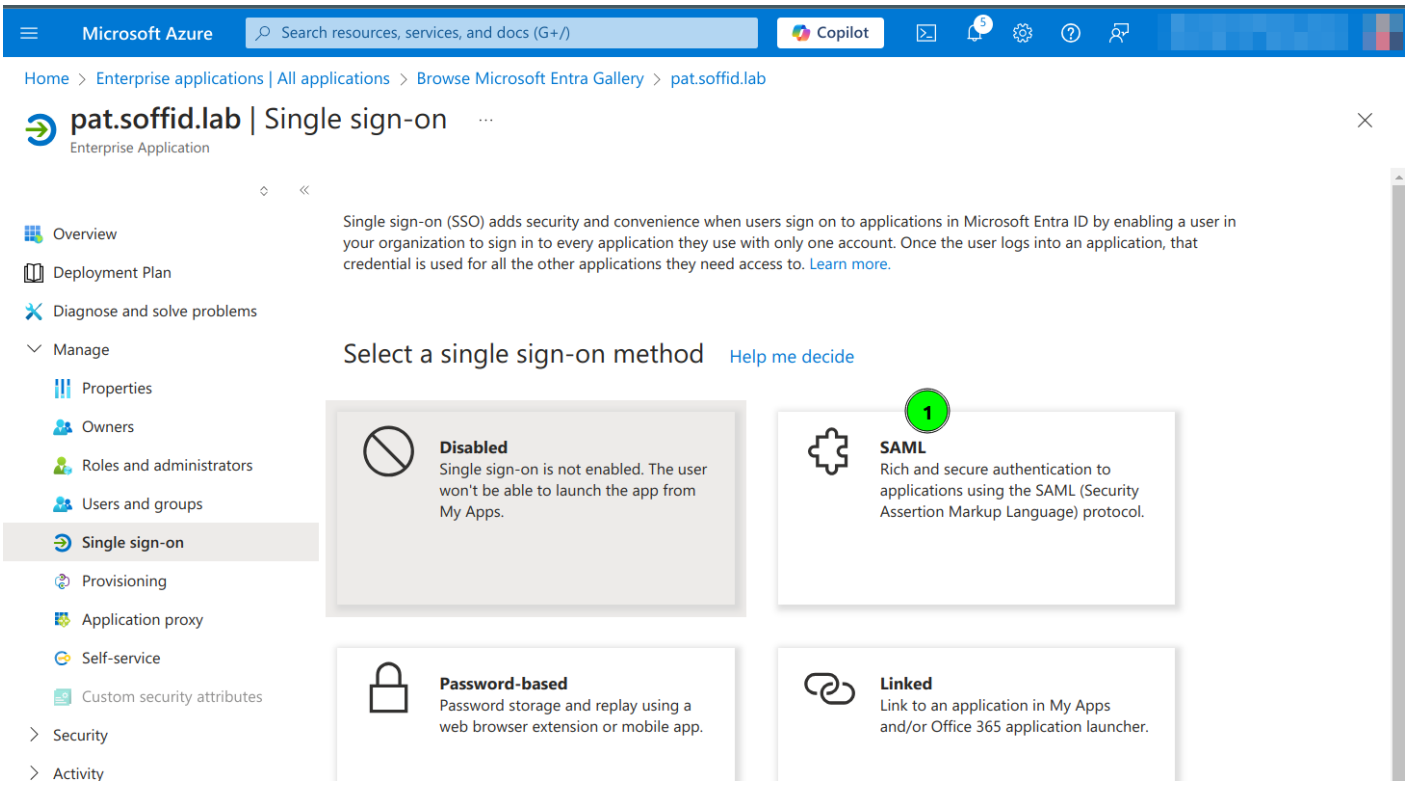

5. Type the name of your app and select the "Integrate any other application you don't find in the gallery (Non-gallery)" option

6. Click on **Set up single sign on**

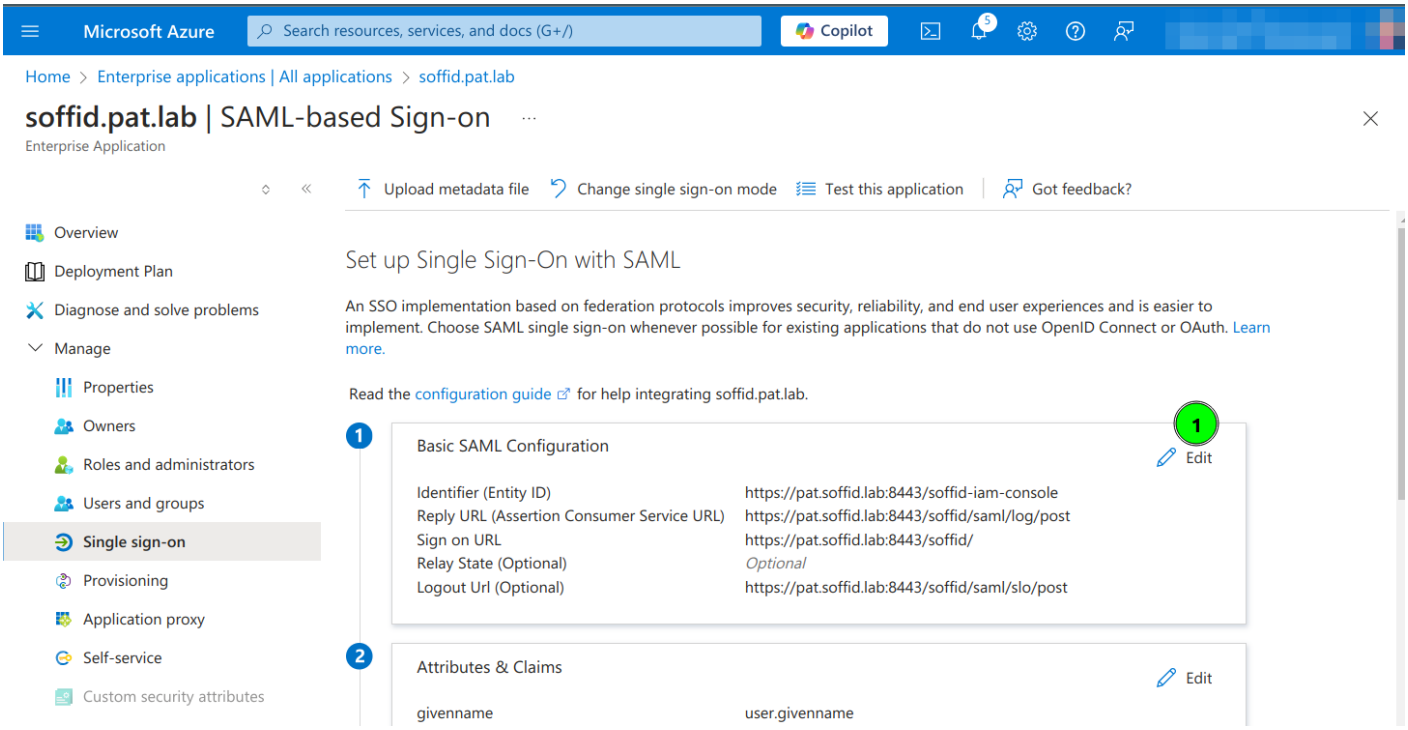

7. Click the **SAML** option

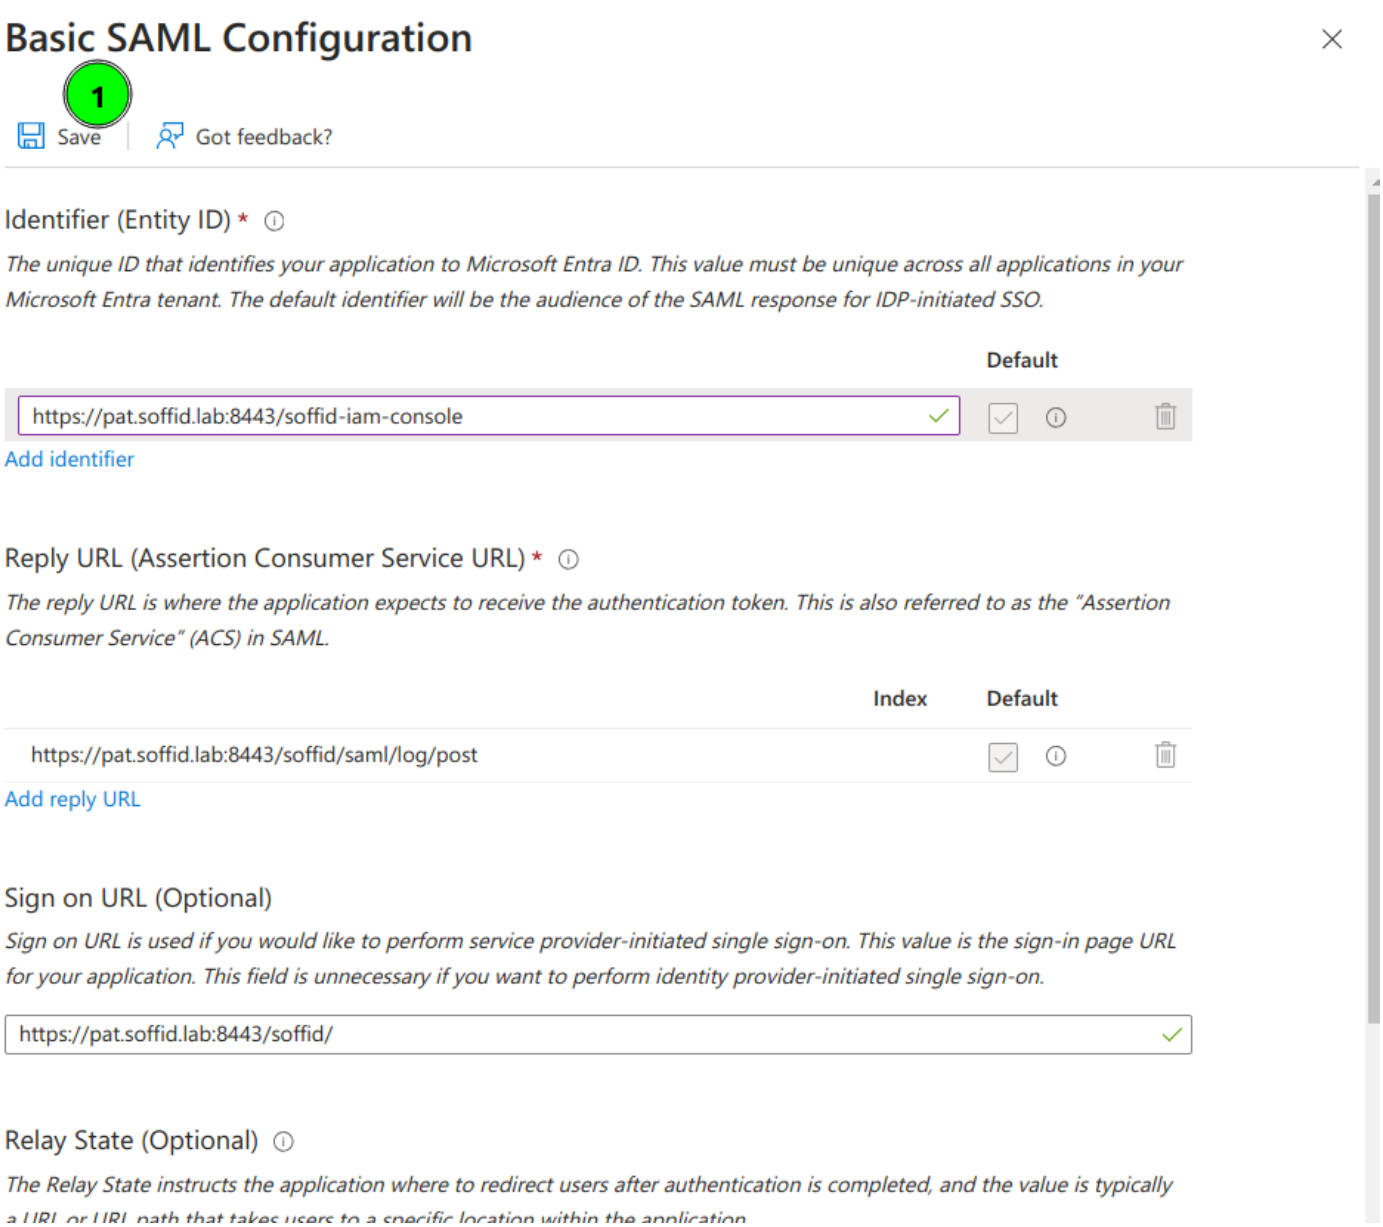

8. Enter the **Basic SAML Configuration** and Save:

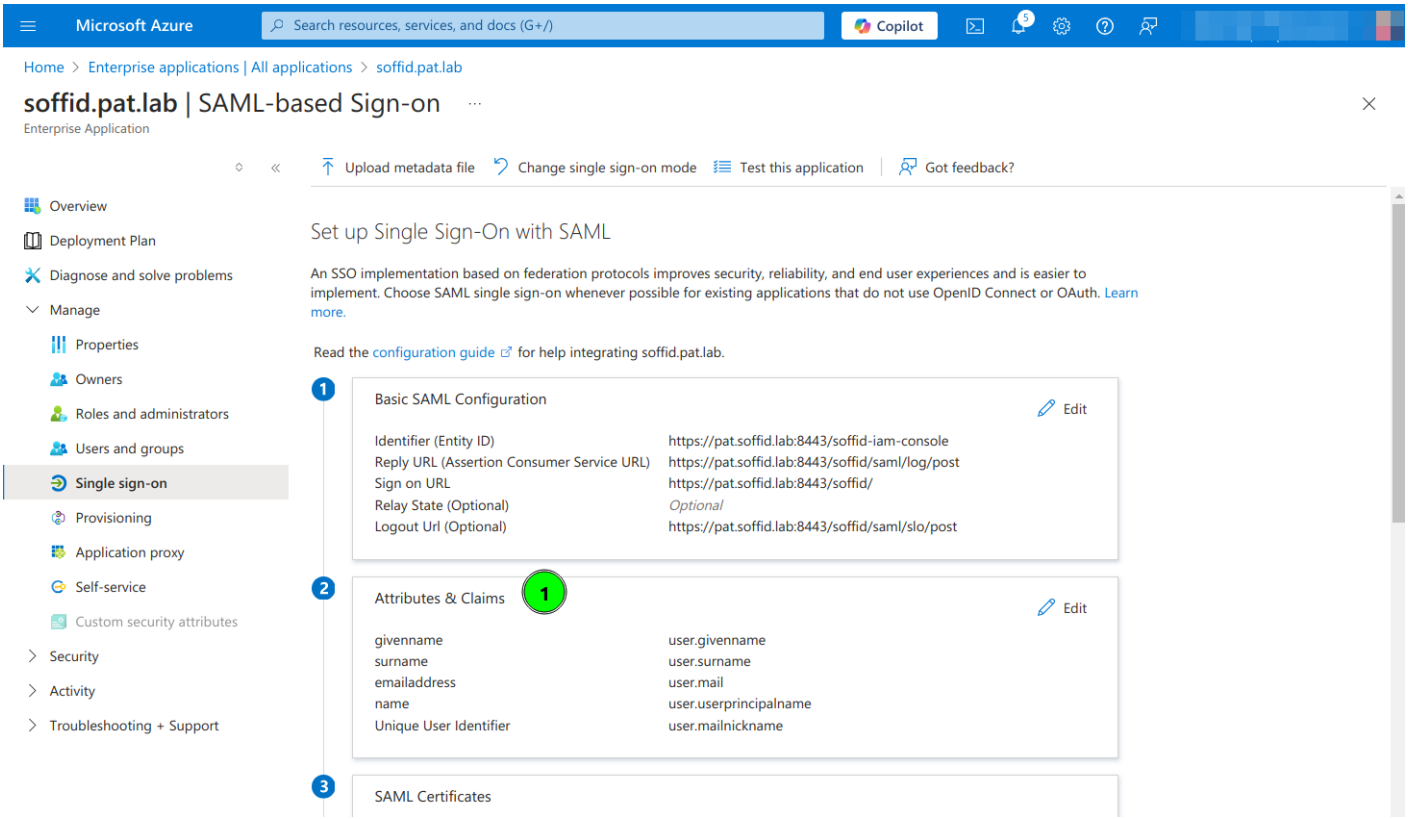

- **Identifier**: https://<YOUR-SERVER>/soffid-iam-console

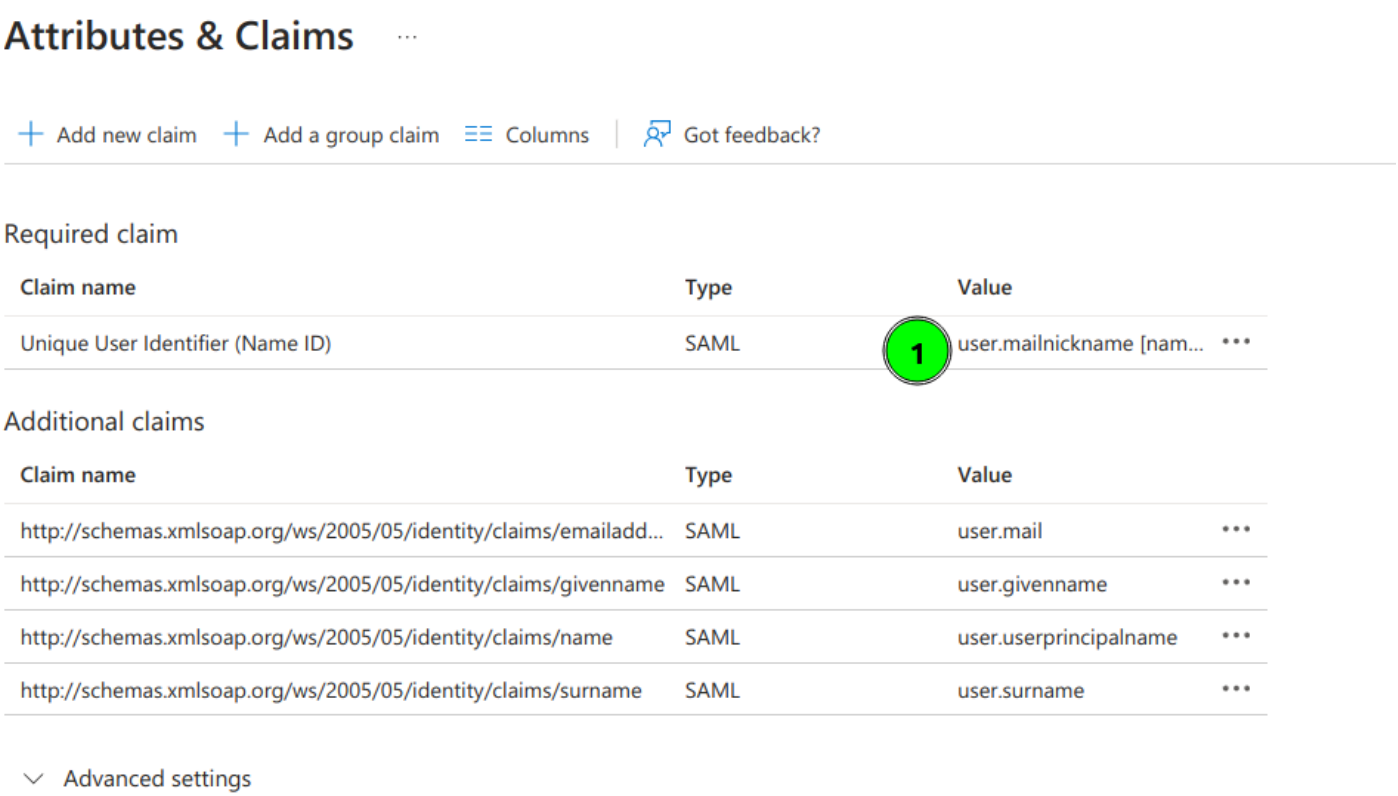

- **Reply URL**: https://<YOUR-SERVER>/soffid/saml/log/post
- **Sign on URL**: https://<YOUR-SERVER>/soffid/
- **Logout URL**: https://<YOUR-SERVER>/soffid/saml/slo/post

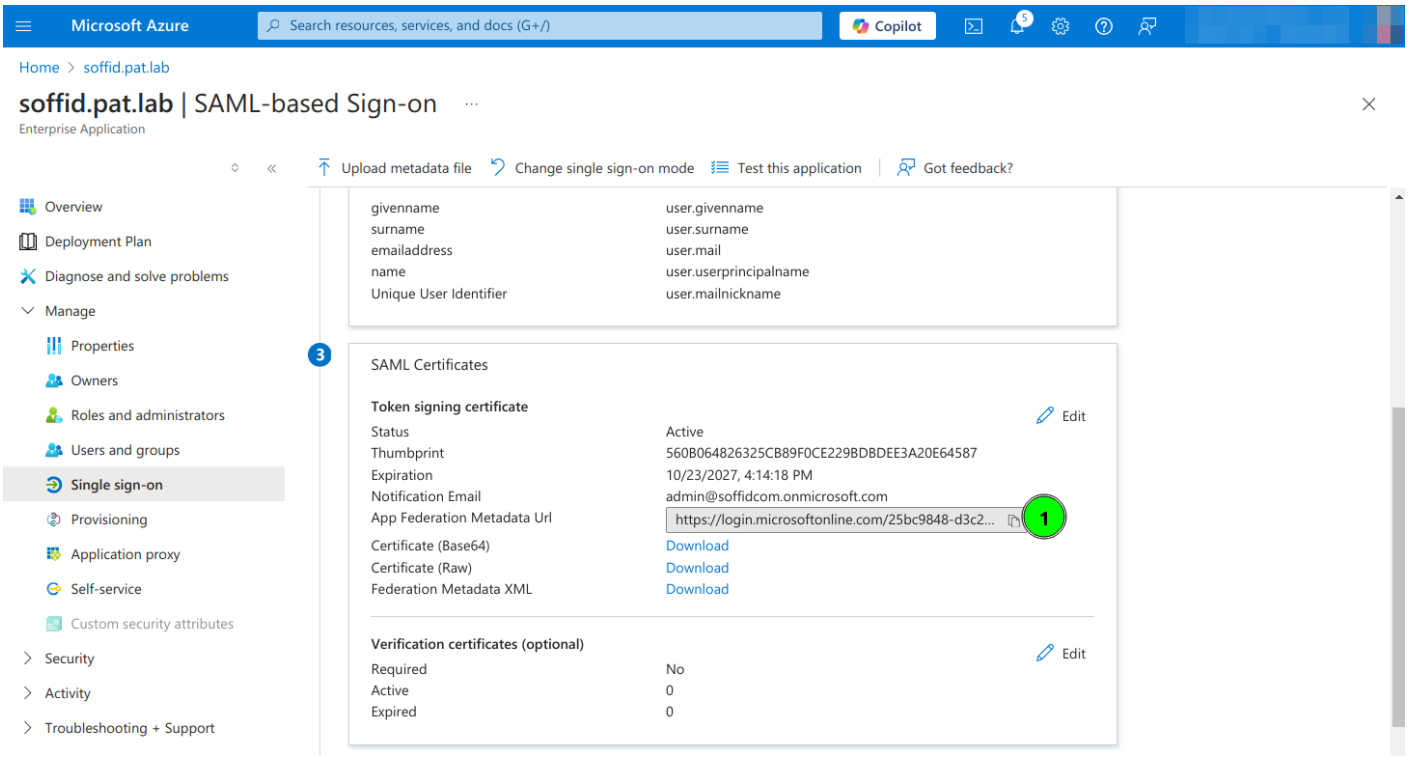

9. Configure **Attributes & Claims** and change the attributes and claims to send the mailnickname as the user identifier (nameid)

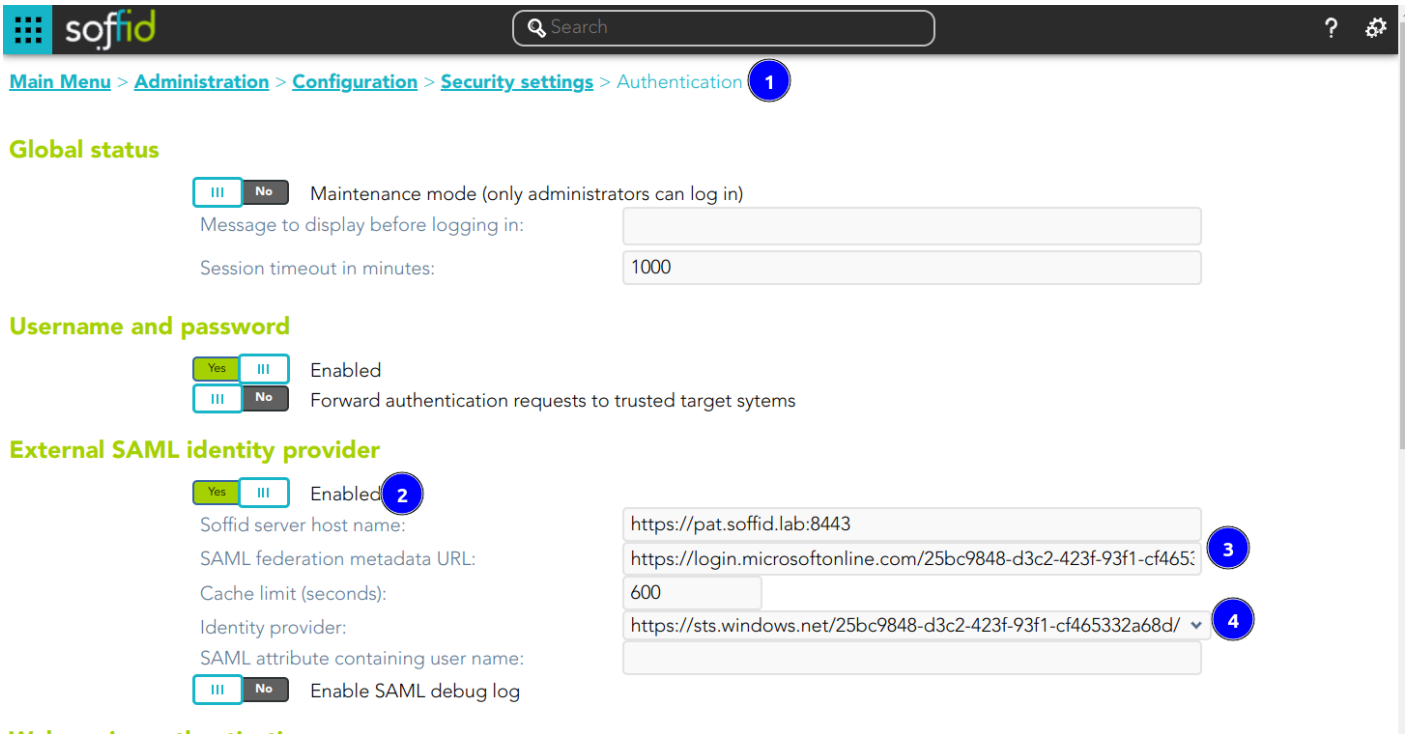

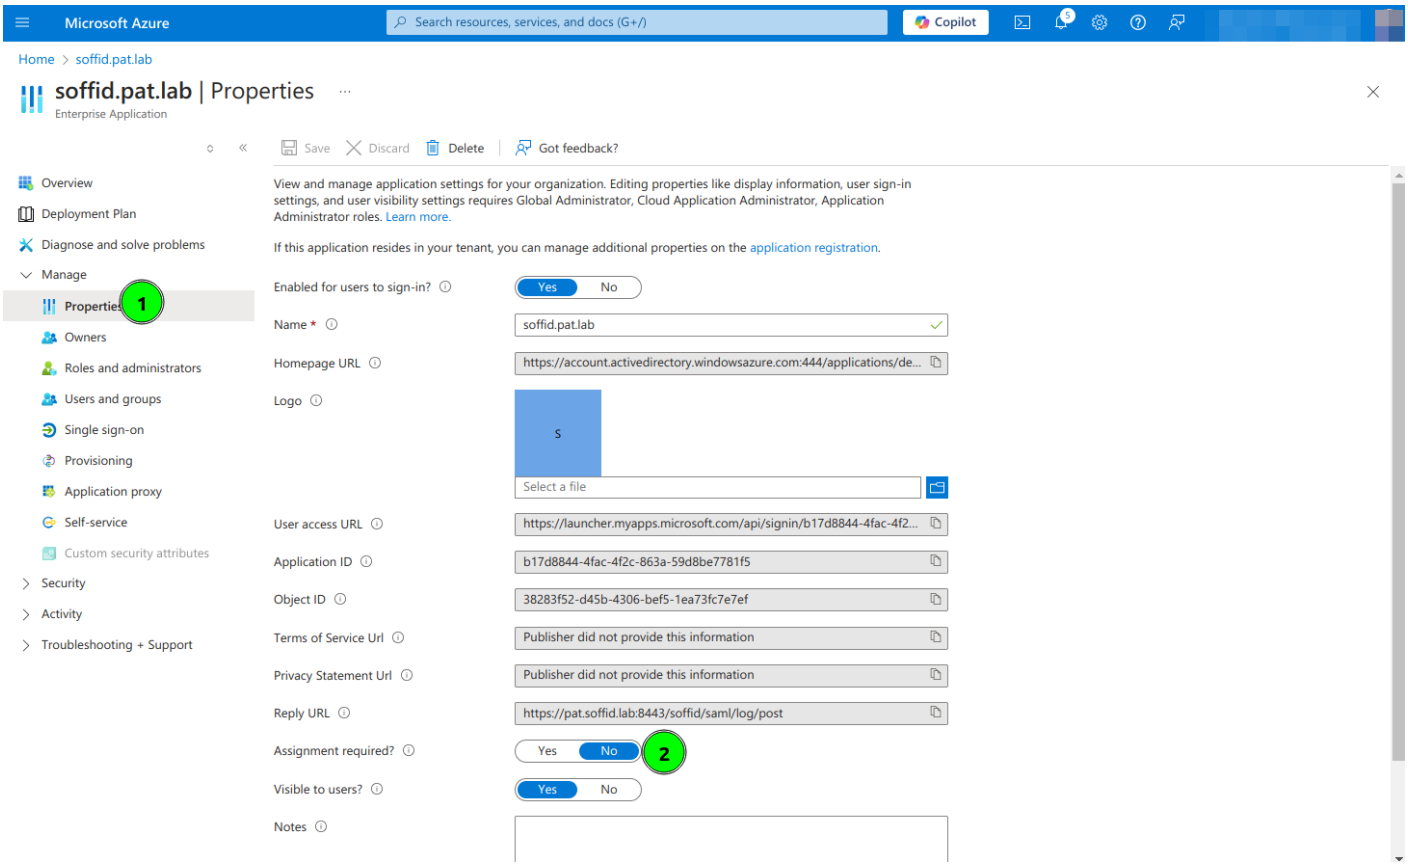

10. Copy the App Federation Metadata Url

11. Configure the **External SAML identity Provider** in the Soffid Console Authentication page

12. Optional, **enable any user to login**
