Roles

Description

Soffid allows you to create roles to specify permissions that can be assigned to a user, a group, or an account. These permissions determine what operations are allowed on a resource. You can use roles to delegate access to users, applications, or services. The main goal is to achieve optimal security administration.

Roles can be defined at different levels:

- Organizational permissions.
- Application permissions.
- Low-level permissions.

When needed, generic roles can be created. When such a role is granted to any user, it is converted into a specific role by specifying an organization unit, information system, or a specific value. So, for instance, a generic emergency coordinator role can be created. The master emergency coordinator will have this role granted for the whole organization, while a remote office emergency coordinator will have this role granted for his single unit.

> Note that a role can belong to an information system with a defined role definition process.

Standard attributes

Role detail

- **Name**: name used to identify the role
- **Description**: detailed role description.
- **System**: information storage system from a technical point of view (active directory, database, CSV, …).
- **Category**
- **Information system name**: asset or application, from a functional point of view, on which the permissions are granted or revoked.
- **Domain**: limitation of role scope to this domain. Initially, there are two domains defined, Groups and Information Systems. It is allowed to add more domains.

- **BPM enabled**: if you check this option (value selected is Yes) this role will be available in the Permissions management workflows.
- **Approval start**: at this date, Soffid will connect to the system and will assign the role. If there is no approval start, it will be assigned at the moment.
- **Apploval end**: at this date, Soffid will connect to the system and will revoke the role.

Granted roles

On the granted roles tab, you can assign the privileges of this role to another role in another system.

Assign privileges

To assign privileges you should click the button with the add (+) symbol, then select the target role, the domain values when necessary, and click the finish button. At this point the record will be added to the list.

Now you can check or uncheck the mandatory field.

- Mandatory: the roles with this flag checked will be displayed in the user's effective roles tab.
- No Mandatory: roles with this flag unchecked will be displayed in the user's roles tab and can be managed. It is not automatically assigned to users who already had the parent role.

And finally, you should click the Apply changes button to save the changes. With this operation, all the permissions of this will be assigned to the target role.

Revoke permissions

If you want to revoke permissions, you must select one or more records from the list and click the button with the subtraction symbol (-) and then click the Apply changes button to save the changes.

Preview changes

In addition, you can check the preview changes, it display information about the action, the user or account, and the role or domain, and you can apply them.

Users

On the users tab, you can assign or revoke roles. To **assign a role** you must click the button with the add symbol (+) and choose one or more users, fill the scope when it is mandatory, and set membership properties. Each role needs an account to be applied to, so, if a user has no account on a system and a role on that system is granted, a new account will be created on this system. In case a user has more than one account on a system, you should indicate which of the suitable accounts will be granted the role.

It is also possible to **revoke roles** to the user from the entitlement details or by selecting one or more records from the list and clicking the button with the subtraction symbol.

The users with the role assigned by rules will be displayed with different colors. Soffid does not allow to revoke roles, on that page, that were assigned by rules.

Additionally, you can **download a CSV file** with the basic users data.

Actions

Roles query

Query	Allows you to query roles through different search systems, Quick, Basic and Advanced.
Add or remove columns	Allows you to show and hide columns in the table. You can also set the order in which the columns will be displayed. The selected columns and order will be saved for the next time Soffid displays tihis page.
Add new	Allows you to add a new role in the system. You can choose that option on the hamburger menu or click the add button (+). To add a new role it will be mandatory to fill in the required fields
Delete	Allows you to remove one or more roles by selecting one or more records and next clicking the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.

Import	Allows you to upload a CSV file with the role list to add or update roles to Soffid. First, you need to pick up a CSV file, that CSV has to contain a specific configuration. Then you need to check the content to be loaded, it is allowed to choose if you want or not to load a specific attribute. And finally, you need to select the mappings for each column of the CSV file to import the data correctly and to click the Import button.
Download CSV file	Allows you to download a csv file with the basic roles data.
Bulk actions	Allows massive operations to be performed on all system roles. With that operation, updates can be made to any of the role's parameters. First of all, you must select the records that you want to update, once you have selected them, you must choose the bulk action on the hamburger icon. For more information visit the Bulk action page.

Roles detail

Delete	Allows you to delete a role. You can choose that option on the hamburger icon. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.
Preview changes	Shows the pending changes on users or accounts. Soffid displays the information about the user or accounts, the action and de Role. You can choose if you want to apply the changes, or close the previer changes window.
Apply changes	Allows you to apply the pending changes.
Undo	Allows you to quit without applying any changes.

Granted roles

Apply changes	Allows you to update the data changes.
Add	Allows you to add a new granted role. To add a granted role, first you need to click the add button (+). Second, you need to write or search for a role. Once you have selected the role, if it is necessary, the next step will be to set the scope. Then, you need to finish the process. And finally, you need to apply changes.
Delete	Allows you to delete one or more granted roles. To delete you need to select the records and then click the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. And finally, you need to apply changes.

Preview changes	Shows the pending changes on users or accounts. Soffid displays the information about the user or accounts, the action and de Role. You can choose if you want to apply the changes, or close the previer changes window.
Apply changes	Allows you to apply the pending changes.
Undo	Allows you to quit without applying any changes.

Grantee roles

Add	Allows you to add a new grantee role. To add a grantee role, first you need to click the add button (+). Second, you need to write or search for a role. Once you have selected the role, if it is necessary, the next step will be to set the source scope and the scope. Then, you need to finish the process. And finally, you need to apply changes.
Delete	Allows you to delete one or more grantee roles. To delete you need to select the records and then click the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. And finally, you need to apply changes.
Preview changes	Shows the pending changes on users or accounts. Soffid displays the information about the user or accounts, the action and de Role. You can choose if you want to apply the changes, or close the previer changes window.
Apply changes	Allows you to apply the pending changes.
Undo	Allows you to quit without applying any changes.

Grantee groups

Add	Allows you to add a new grantee group. To add a grantee group, first you need to click the add button (+). Second, you need to write or search for a group. Once you have selected the group, if it is necessary, the next step will be to set the scope. Then, you need to finish the process. And finally, you need to apply changes.
Delete	Allows you to delete one or more grantee groups. To delete you need to select the records and then click the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. And finally, you need to apply changes.
Preview changes	Shows the pending changes on users or accounts. Soffid displays the information about the user or accounts, the action and de Role. You can choose if you want to apply the changes, or close the previer changes window.

Apply changes	Allows you to apply the pending changes.
Undo	Allows you to quit without applying any changes.

Users

Add or remove columns	Allows you to show and hide columns in the table.
Add	Allows you to add users or accounts to assign the role. To add users or accounts, fist of all, you need to click the add button (+) or the "Add new" action located on the hamburger icon. Second, you need to search the users and/or accounts and select the users and/or accounts you want to add. Once you have selected the users and/or accounts, if it is necessary, the next step will be to set the scope. Then you need to fill in the membership properties and finish the process. Finally, you need to apply changes.
Delete	Allows you to delete one or more users and/or accounts, that is, Soffid will revoke the role. To delete one, you can select the record and click the button with the subtraction symbol (-) or the trash button located at the end of the row. To delete more at the same time, you need to select the records and then click the button with the subtraction symbol (-). To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. And finally, you need to apply changes.
Download CSV file	Allows you to download a CSV file with all the information about users.
Import	
Preview changes	Shows the pending changes on users or accounts. Soffid displays the information about the user or accounts, the action and de Role. You can choose if you want to apply the changes, or close the previer changes window.
Apply changes	Allows you to apply the pending changes.
Undo	Allows you to quit without applying any changes.
