Search Types

Description

Throughout the Soffid you will be able to perform searches on the different objects that make up the application.

You will be able to search in the system by applying different ways of searching.

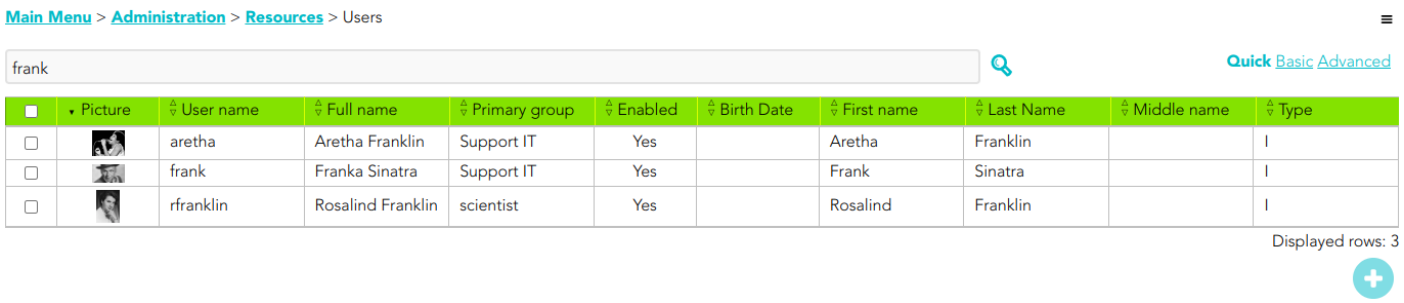

Quick

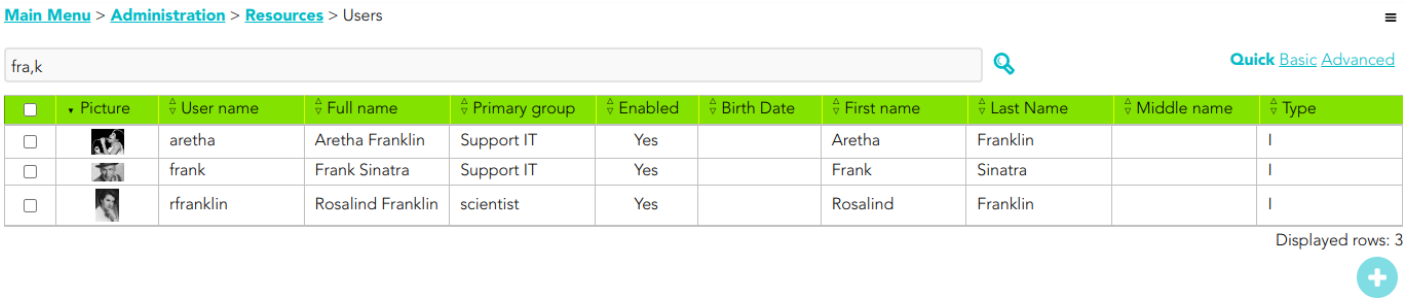

This option allows a quick search by fields that have been defined in the application metadata. You can find metadata configuration on Global Settings > Metadata

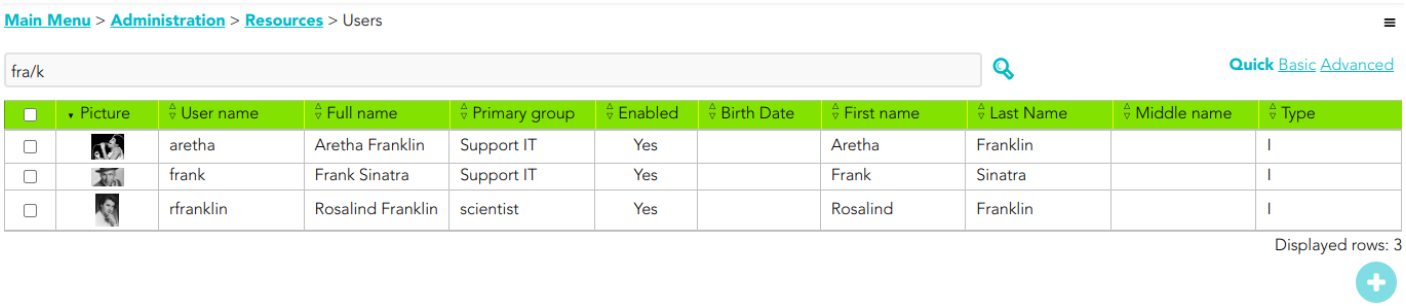

You only have to type in the field provided for this purpose and press enter or click on the magnifying glass, then Soffid will display the list with the objects that complain the criteria typed.

You can include some characters "," "." and "/" as word separators in the search text.

Example

Basic

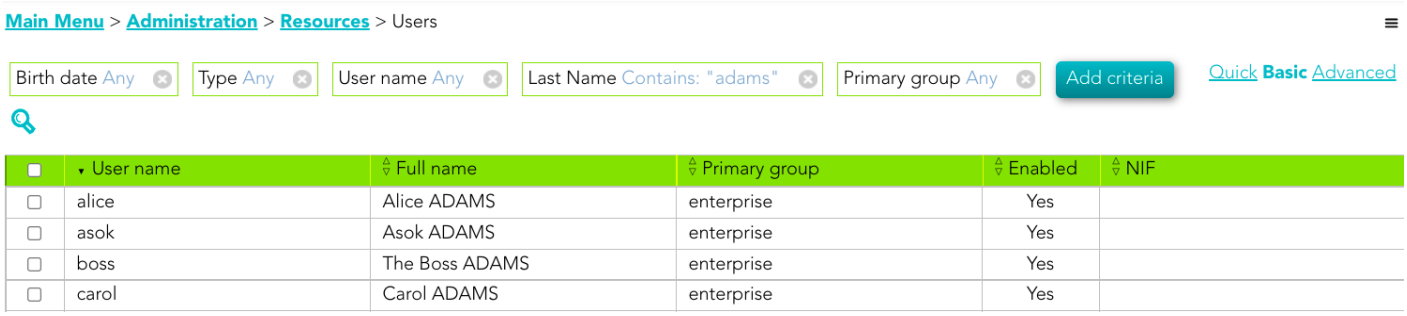

This is the default option. It provides some default search criteria and other criteria can be added from the add criteria option. These criteria will depend on the entity or object on which the search is being performed.

Remember, each criteria will be added to the previous ones. Each search criterion will have different search forms depending on the type of data in the particular field. For instance, a text field provides four different options to search, "Contains", "Start with", "End with" and "Equals", a date field provides the date "Since" and date "Until".

Soffid allows you to and criteria by clicking on the Add criteria button, then Soffid will display a list with all the criteria available and allows you to select to add a new one. To delete criteria you only have to click on the Equis icon (x) of the criteria you want to remove and automatically Soffid will remove the criteria and run the search without the removed criteria.

The criteria depend on the object list where you are working, so for instance the criteria are not the same for the user's list and the group's list.

Example

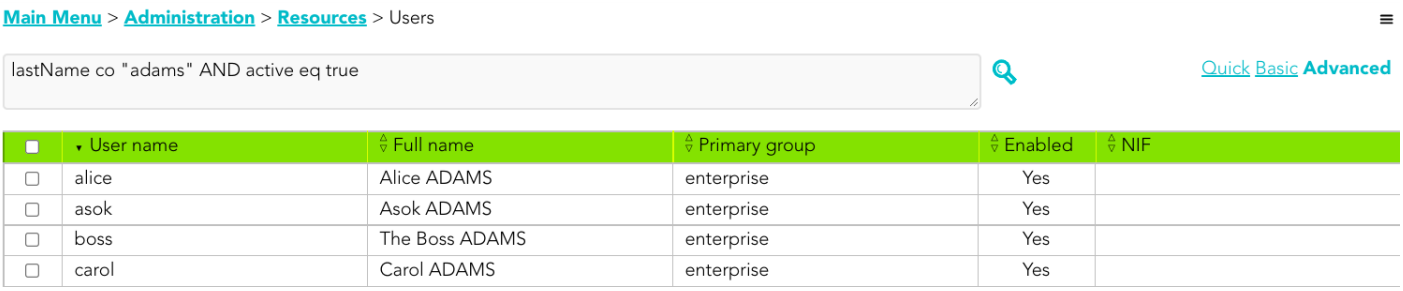

Advanced

This option allows an advanced search system using the **SCIM standard**. You can type the query to search the info using the SCIM standard.

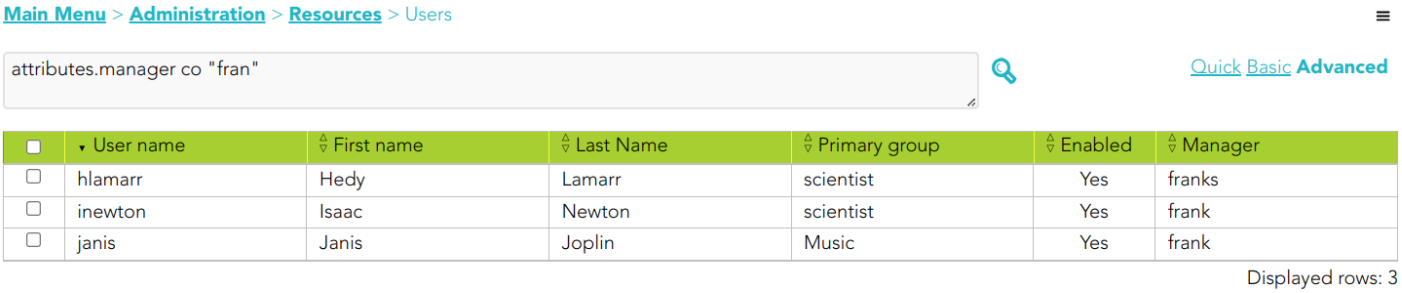

> You can access to SCIM Book for more information

Example 1

	User name	Full name	Primary group	Enabled	NIF
☐	alice	Alice ADAMS	enterprise	Yes	
☐	asok	Asok ADAMS	enterprise	Yes	
☐	boss	The Boss ADAMS	enterprise	Yes	
☐	carol	Carol ADAMS	enterprise	Yes	

Example 2

	User name	First name	Last Name	Primary group	Enabled	Manager
☐	hlamarr	Hedy	Lamarr	scientist	Yes	franks
☐	inewton	Isaac	Newton	scientist	Yes	frank
☐	janis	Janis	Joplin	Music	Yes	frank
