- Add sleep method
- Add index by user attribute value
- Enlarge previous executions table #587
- Fixed counter generation #580
- Remove old WF to reconcile accounts #579
- Upgrade plugins #576
- Fix style of screen to change password #573
- setTimeout function
- Fix error during datadiv initialization #571
- Upgrade rest plugin
- Upgrade zkdb #569
- Hide agent tabs until the agent iss created #568
- Fix method to disable accounts #547
- Change messages source
- Fix button to remove rols #530
- Fix field type in account metadata window
- Javascript methods: setTimeout and sleep
- Improve columns selector

- **Syncserver 4.0.23**
 - Use service locator in remote proxies
 - Upgrade zkdb version
 - Fix null pointer in pre-update-password trigger
 - Update console version
 - Enable debugging for com.soffid classes
 - Add log manager for proxy agents
 - Improve method to remove accounts
 - Hide ProxyConnectionFactory logs
 - Improve loader process
 - Fix reconciliation without system name
 - Improve loader performance
 - Added debug information
 - Fix console sessions are dropped due to delays
- **REST plugin 4.0.4**
 - Fix login encoding
 - Use load or select methods
- **SQL server plugin 4.0.1**
 - Version number was missing
- **PAM (only in Docker Hub) 1.4.82**
 - Do not remove static-data directory

2026-02-11

- **Console 4.0.33**
 - Fix group message #392
 - Make error message more helpful
 - Default port for syslog+ssl is 6514
 - Include script stack trace
 - Add webservice classes classifier
 - Add offline button in sync server monitoring
 - Fix page to query account's password
 - Fix method to propagate changes
 - Improve monitoring page
 - Enable remove button in single-selection tables
 - Remove method to compute policies when synchronizing objects
 - Change installer icon
 - Fix upgrade of domain values to version 4
- **Syncserver 4.0.25**
 - Fix authoritative loader engine
 - Fix tasks to synchronize objects
 - Improve mechanism to monitor tasks queue
 - Upgrade console version

- Change version number to 4 in application link
- Do not throw exception when the group is not allowed
- **Federation addon 4.0.14**
 - Fix for the automatic deletion process of oauth tokens
 - Fix duplicated attribute
 - Fix class-loading problem when invoked from the identity provider
 - Use new "wait" icon #57
 - Change style of cancel button #56
 - Fix selector color #55
 - Fix host tokens tab #Soffid/console/632
 - Add option to remove authentication methods #611
 - Fix initialization
 - Fix progressive profile method
 - Update OTP addon version #536
 - Place CAS Settings in a separated section
 - Remove legacy method to register hosts
 - Hack for MFA authentication on Azure
 - New keytab parser
- **SCIM addon 4.0.3**
 - Fix class not found: UserType
- **XACML addon 4.0.6**
 - Fix legacy icons #6
 - Properly expose endpoint in XACML rules

2026-02-18

- **Console 4.0.37**
 - Fix magnifier icon in password vault
 - Improve method to guess account bound to a service
 - Fix account lookup
- **Syncserver 4.0.27**
 - Change JVM parameters for Java 17
 - Discard service 113/tcp ident
 - Ignore hosts without significant services
- **Reports addon 4.0.7**
 - Change label in remove button #10
 - Remove import button #8
 - Remove import button #7
 - Fix label for removal button #6
 - Fix wrong message after removing report schedule #5
 - Fix tab to upload reports #4

2026-02-24

- **Console 4.0.38**
 - Fix open source publication process
- **Syncserver 4.0.28**
 - Fix null pointer changing service account password
 - Always one shared thread
 - Improve logs
 - Fix reconcile without external ids
 - Remove unneeded log
 - Change attribute name from lastPasswordUpdate to lastPasswordSet
 - Do not CXF spring integration
- **Federation addon 4.0.15**
 - Fix null pointer
 - Adapt porting of changes from version-3
 - Fix porting
 - Add option to set custom audiences
 - SSO Behaviour
 - Add audience field
- **Backup addon 4.0.5**
 - Hide user backup id in queries #6
 - Change buttons style
 - Remove quick search mode
 - Remove button to select columns #4
 - Remove duplicated buttons #3
 - Fix excessive inheritance
- **PAM (only in Docker Hub) 1.4.84**
 - SSH Server with user provided passwords
 - Improve logs
 - Update browser image
 - Fix compilation errors
 - Additional log

2026 march

2026-03-04

- **Console 4.0.39**
 - Fix compatibility issue with HTML fields
 - Allow accounts to have the same name as a deleted one
 - Properly unwrap javascript dates
- **Syncserver 4.0.30**
 - Fix method to retrieve account object
 - Fix interface is defined more than once
 - Improve exception detail
 - Upgrade version of iam-core
 - Fixes to convert localdate into Calendar or Date

2026-03-11

- **Console 4.0.42**
 - Improve migration process
 - Debug mail sessions #Soffid/cloud/federation-cloud/10
 - Add method to fetch AD domains
- **Syncserver 4.0.31**
 - Upgrade console dependency
 - Fix dumping log in stdout
- **Federation addon 4.0.18**
 - Refresh configuration when needed
- **Recover password addon 4.0.7**
 - Fix fill-in window style #17
 - Fix error checking for null datatype #11
 - Fix message generation #10
 - Fix button message #9
- **Admin addon 4.0.5**
 - Fix dependency versions #8
 - Use the right interpreter
- **BPM addon 4.0.7**
 - Fix display of risks
 - Show BPM editor with PAM license

- Menu handler in account reservation workflow
- Fix editor display
- Use correct colors for diagram #26
- Fix reorder fields #24
- Add button to remove attributes from attribute window
- **LDAP connector 4.0.1**
 - Multiple bug fixes
- **SAP connector 4.0.1**
 - Fix checkbox to manage roles
 - Remove eclipse file
 - Fix account reconciliation
- **Windows connector 6.0.11**
 - Fix method to rename objects
 - Fix simple windows agent
 - Use server method to retrieve active directories
 - Update CI/CD method

2026-03-18

- **Console 4.0.46**
 - Improve migration process
 - Debug mail sessions
 - Add method to fetch AD domains
 - Change method to publish
 - Do not fail when a file does not exist
 - Ignore host not found
 - Fix error when host does not exist in PAM URL
 - Remove account attributes (migration issue)
 - Improve scheduled tasks form
 - Fix SQL syntax error
 - Migration issue. Set default dispatcher type
- **Federation addon 4.0.19**
 - Fix double quote
 - Same challenge for each push authenticator
 - Accept gateway parameter for CAS login

2026-03-25

- **Console 4.0.47**
 - Fix renaming a role with the same name as a deleted one
 - Fix upgrade to version 4

- Improve exception message including javascript stack trace
- Add password policy metadata for IA generation
- Improve SEQUENCE generator. Add a primary key to the table
- **Federation addon 4.0.20**
 - Verify signatures
 - x-forwarded-for does not contain commas
 - Propagates loa from third party idp
- **Windows plugin 6.0.12**
 - Fixes a "Connection timeout" problem when trying to fetch accounts list
- **PAM (only in Docker Hub) 1.4.86**
 - Upgrade chrome version
 - Add gke image
 - Kiosk mode for http and https
 - Accept pke keys in base64
 - Always apply ips policies
 - Remove duplicated /
 - Avoid null pointer

2026 april

2026-04-22

- **Console 4.0.53**

- Fix error creating mappings
- Prevent null pointer
- Fix method to find deleted roles
- Fix popup window with system raw attributes
- Allow metadata types page in AM license
- Update LDAP & Windows plugin
- Cleanup latest link
- Fix infinite loop starting a discovery task
- Prevent deadlock when changing an account password on the sync server
- feat: Add global SAML logout option
- Improve remote action log
- Fix role deletion
- Add entry point metadata
- Publish issue service
- Add missing class
- Make last execution label more clear
- Allow port in syslog server parameter
- Option to not to store user credentials
- Fix when the server is a standby server
- Send syslog message size
- Display error message when connecting to a sync server
- Option to not to store user credentials
- Allow manual launcher when passwords are not stored
- Fix merge errors
- Improve launching accounts without well-known password
- Improve log file selector
- Fix link creation for documentation
- Fix link creation
- Fix syncserver is marked as offline
- Optimize creation of the search dictionary

- **Syncserver 4.0.34**

- Debug in BaseAgent
- Update jaxb implementation
- fix: Pipelines are not fully loaded
- Change deployment URL

- Publish syncserver on docker hub
- Fix error processing duplicated OoB task
- Force method to initialize trusted certificates from source
- Log certificate failures
- Upgrade console
- Ignore stand-by servers in servers list
- Decode username in remote request
- Add jsoncpp dependency for role mining
- Fix error in passwordless agents
- Fix transaction to change service passwords
- Method to ignore standby servers
- **Federation addon 4.0.23**
 - fix: refresh token expiration date can be null
 - feat: Options to customize user registration process
 - Fix null pointer
 - New method to register users
 - feat: Registration process can be the initial step of a progressive profile
 - feat: support the response_mode=form_post
 - feat: Ability to configure refresh token timeout
 - Usage of expiration token timeout
 - Method to fetch all esso settings at once
 - Fix null pointer
 - Update expires attribute in refresh token
 - Fixes fields without datatype
 - Fix generation of refresh token expiration claim
- **Role mining addon 4.0.1**
 - Fix Null pointer
 - Application is not required
 - Update war plugin
 - New performance engine
 - Adapt CI/CD
 - Update repositories
 - Remove duplicated entry in pom.xml
 - User C++ image
- **SCIM addon 4.0.4**
 - Fix patch of account object
- **LDAP plugin 4.0.4**
 - Multiple bug fixes
 - Fix login
 - Method to configure the LDAPS security level
- **PAM (only in Docker Hub) 1.4.88**
 - New image for http session in mode kiosk and not-kiosk
 - Option to open a wireguard tunnel
 - feat: option to maximize screen
 - fix: Click up windows key after losing focus
 - Fix keypad subtract key

- Fix transfer of file with UTF-8 characters in its name
- Fix session is closed after ten seconds

2026 may

2026-05-06

- **Console 4.0.56**

- Improve method to launch entry points
- Fix method to jump into soffid console
- Fixes problem due to secure class loaders
- Allow creation of hosts by users allowed to create hosts on a single network
- Improve method to update user aliases. Remove alias if no other user is assigned
- Fix ordering of recertification date
- Remove account services before removing accounts
- Fix query of custom objects
- Fix compilation error
- Fix HQL error
- Fix upgrade in sql server
- Fix null pointer during upgrade process

- **Federation addon 4.0.24**

- Relax CAS Host validation

- **Reports addon 4.0.8**

- Enable dashboards for IGA, AM ad PAM licenses
