

2026-05-20 New feature: set password when enabling an account

The new feature

In the **SAP agent**, when an **account** linked to a user is **enabled**, the agent will set up the Soffid password of the **password domain** account and send it to the connected SAP system via an agent.

Bear in mind

Please note the following points:

- The user's **password domain** will have **value** once at least one password has been assigned.
- The account must be a **single-user account**; these are the ones that can be viewed in a user's accounts tab.

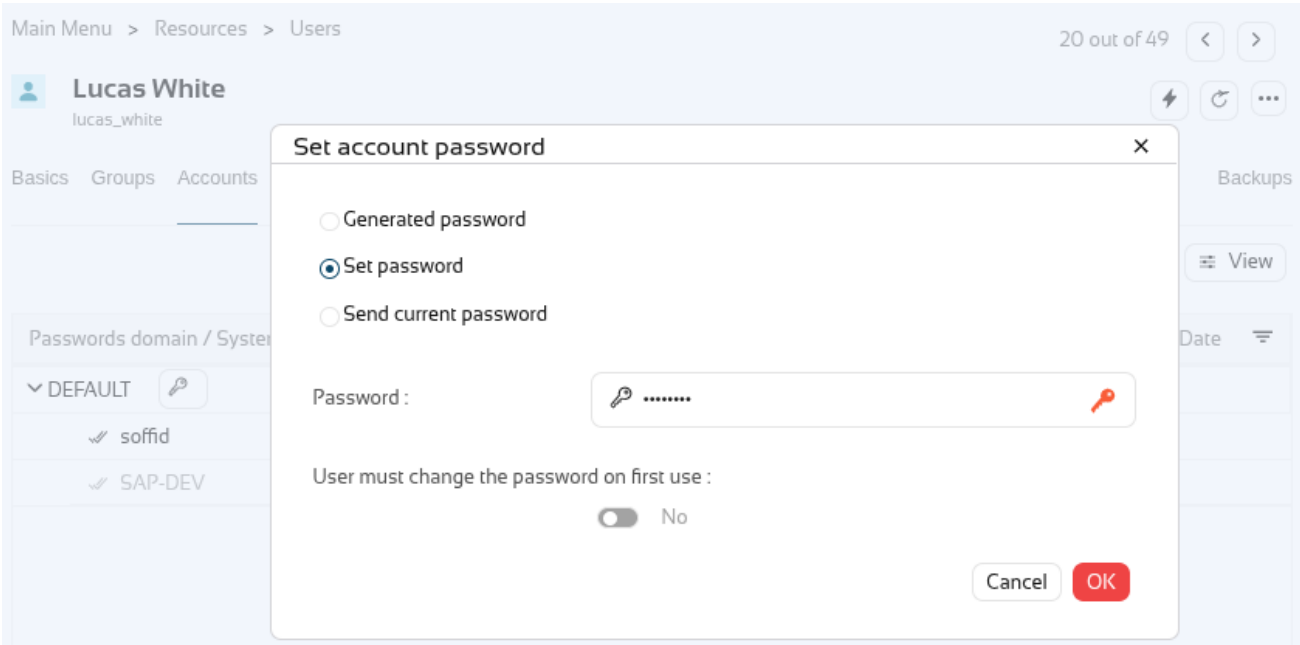

How to configure it?

The following **components** must be installed:

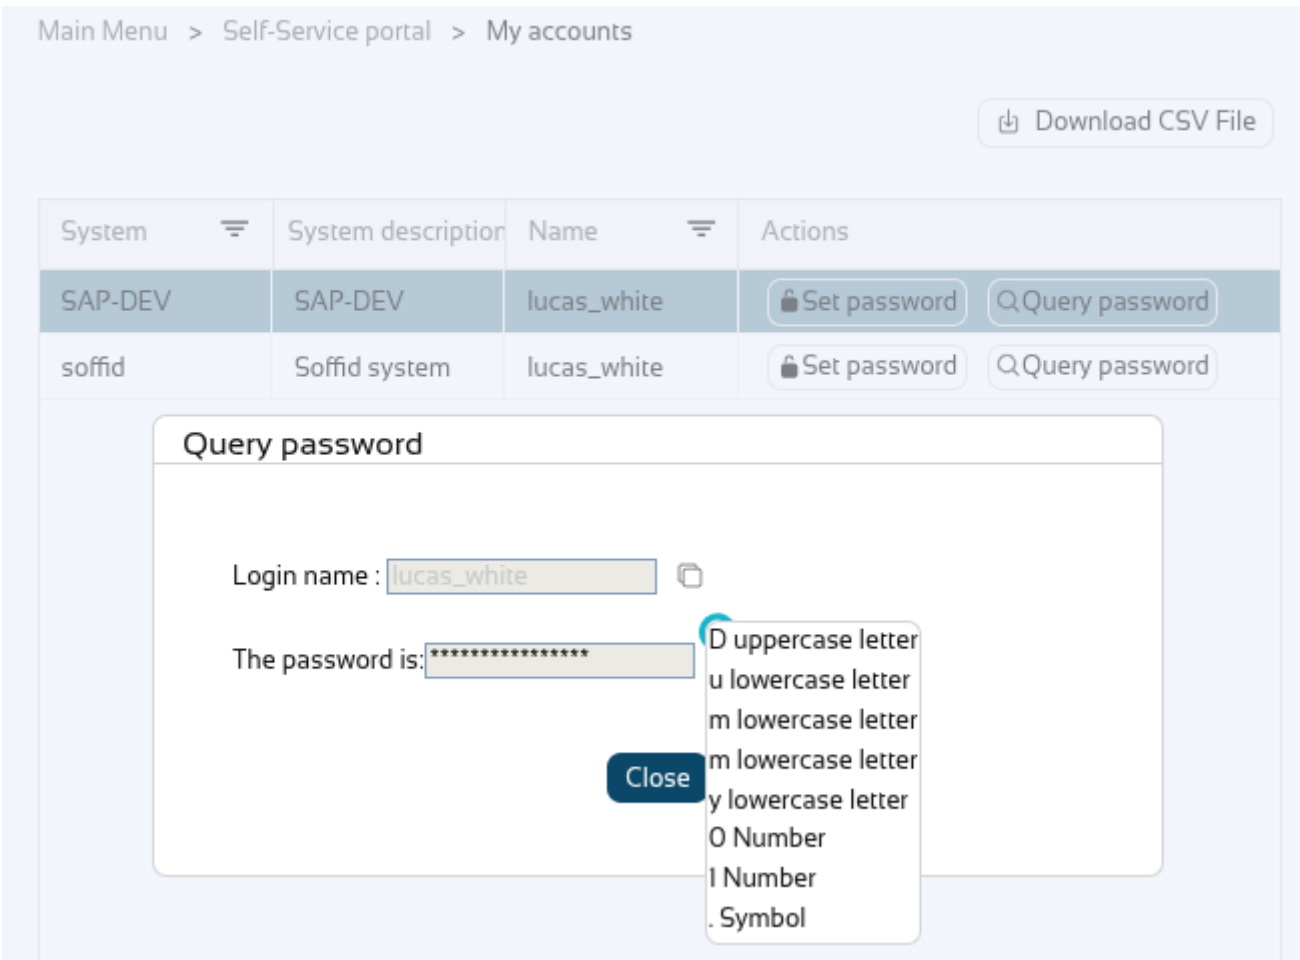

- Console 4.0.57 (or higher)
- Syncserver 4.0.35 (or higher)
- SAP plugin 4.0.2 (or higher)

Let's look at an example

Let's look at an example, here we have the user "**lucas_white**" to whom we are going to assign the password "**Dummy01**".

You can check your password on the "**My accounts**" page, click on the "**View password**" of the "**SAP-DEV**" account.

Now let's **disable** the "SAP-DEV" account.

Main Menu > Resources > Users

 **Lucas White**
lucas_white

⚡ ↻ 📶 ⋮

Basics Groups Accounts Roles Effective Roles Shared accounts Sessions User processes Issues Tokens OTP devices Backups

[Add new](#) [View](#)

Passwords domain / System	Account	Status	Created	Password changed	Expiration Date
▼ DEFAULT 					
✔ soffid	lucas_white	Enabled	04/02/2026 12	25/05/2026 20:42	25/05/2027 20:42
🔒 SAP-DEV	lucas_white	Disabled	25/05/2026 20:41	25/05/2026 20:41	25/05/2027 02:00

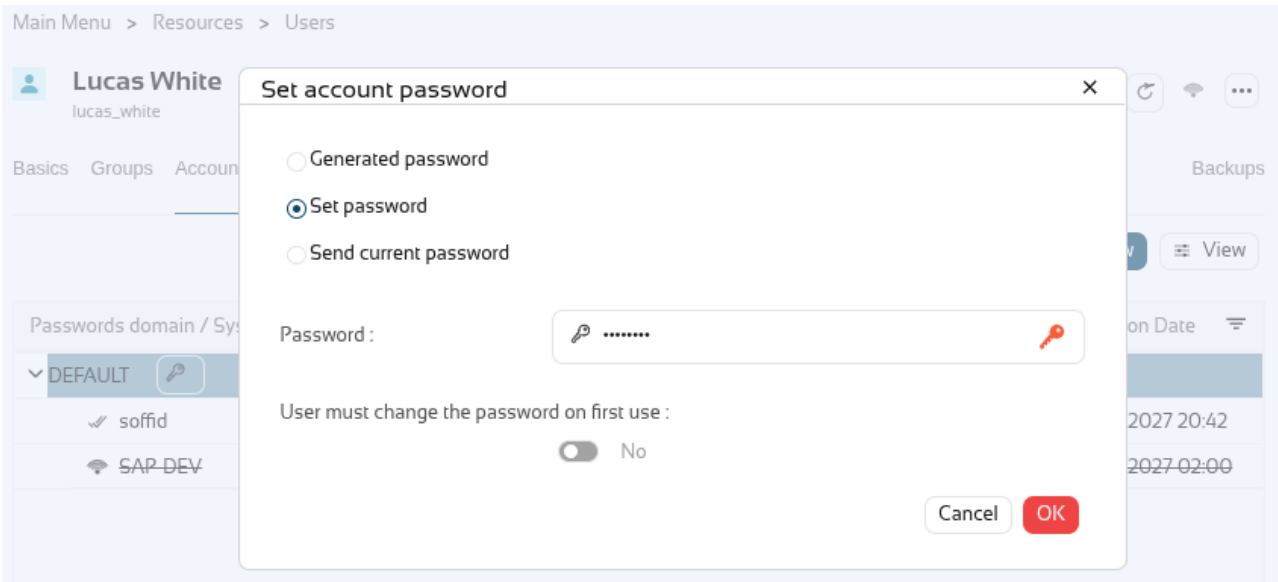

Check the password again, it must be empty.

Main Menu > Self-Service portal > My accounts
