

2026-09-30 New feature: simulate IdP attributes

The new feature

A button has been added to the "Attribute sharing policies" page to **simulate** the **attributes** generated for a **user** and a **service provider**.

Bear in mind

Please note the following points:

- The user must have an **active** Soffid **IdP account**.

How to configure it?

The following **components** must be installed:

- Federation addon 4.0.41 (or higher)

Let's look at an example

Let's go to the "**Attribute sharing policies**" page, in the top right-hand corner, you'll see the new "**Simulate**" button.

Add new Simulate

☐	Policy ^	
☐	Default	
☐	EntityGroupRule	
☐	Public	

In the popup, select a **user** and a **service provider** and click on Simulate.

Main Menu > Configuration > Web SSO > Attribute sharing policies

Add new Simulate

Edit attribute policy

User name *

anna_schmidt: Anna Schmidt

Service Provider *

simple-oidc-tester

Simulate

Close

We can now see the **attributes** that would be **sent** to the **service provider** for this user.

Main Menu > Configuration > Web SSO > Attribute sharing policies

Add new Simulate

Edit attribute policy

User name *

anna_schmidt: Anna Schmidt

Service Provider *

simple-oidc-tester

Simulate Close

Property	Value
sub	anna_schmidt@soffid.com
full_name	Anna Schmidt
userNameUppercase	ANNA_SCHMIDT
meber_of	SOFFID_VAULT_USER@soffid,Cloud Computing Specialist@app-d...
primaryGroup	Germany

If the user does **not** have an **account** or their account is **inactive**, this error will appear.

Edit attribute policy

User name *

frank: Frank Sinatra

Service Provider *

simple-oidc-tester

Simulate Close

An error has occurred

**Error resolving attributes
caused by User frank does not have an active
account in Soffid IDP**

Technical data: +
