# New releases 2026 October

Welcome everyone.

We are pleased to inform you that Soffid **new releases** are now available and we have updated our download page with new versions of the Soffid components.

Please note that in **Soffid 4**, you will only find the **Console** and **Syncserver** on our enterprise download page. Starting with this version 4, **Addons** and **Connectors** must be downloaded directly from the internal **marketplace** on the Licence and plugins page. For more information, please consult our online documentation.

Below is the list of the components and changes made since the previous version was published.

## Soffid 4

### Console 4.0.78 (from 75)

| | |
|---|---|
| tick | Use an alternative method to update the timestamp of an account’s last update. |
| tick | Do not delete an account’s previous status when it is modified in the console. |
| tick | Fix lookup of addon services from Javascript. |
| tick | The name of the policy has been added to the audit logs when granting temporary permissions. |
| tick | Deleting a tenant used to require additional manual steps; the deletion process will now be automatic from the tenants page. |
| tick | Add a method to set pam policy in temporary permission. |
| tick | The chatbot has been improved so that it sends messages whilst processing the prompt until it finally returns the result. |

tick Fix method to get soffid dispatcher in multi-tenant environments.

tick Roles were not being removed from the final system when a delegation was revoked.

tick The deletion of an information system containing relationships to roles that had been logically deleted was failing.

tick On the agents page, when changing the usage attribute, some attributes were not displayed or hidden correctly.

tick In PAM navigation, the copy function has been improved and further error messages have been added.

tick From now on, a user cannot delete their own account.

tick A new method for handling cases where a new user’s name matches that of a user who has already been deleted.

tick The chatbot has been translated into the languages supported by Soffid.

tick The process of searching a user’s accounts of a system has been optimised to run much faster.

tick The time taken to authenticate a user and assign authorisations has been optimised.

tick The method has been revised to prevent duplicate values from occurring during automatic role assignments.

tick New method to properly hide custom fields.

tick Send metrics log to a separate file.

tick Timeouts have been added between the main SyncServer and the remote servers: a maximum of 30 seconds to connect and a maximum of 5 minutes whilst waiting for a response.

## Syncserver 4.0.51 (from 48)

tick Ignore method to check password synchronization in disabled agents.

tick Fix method to get groups hierarchy as grants.

tick Ignore inherited roles from cache.

tick Compatibility method to assign temporary permissions.

tick Make usage of fallback agent stateful.

tick Fixes to reconnect to the main proxy server after two hours.

tick Optimize creation of kerberos agents.

tick Sets timeouts for remote operations.

## Federation addon 4.0.44 (from 41)

tick Allow null secrets for ESSO.

tick Captcha feature has been added to the self-registration page.

tick In a virtual identity provider, the deletion of a service provider was failing.

tick For Kerberos authentication, a 10 second timeout has been added; any longer duration is considered an error.
