
Access logs

Description

The access log page allows querying all the information about the opened sessions.

Note that any session that was active during the specified date will be shown, even when it started before or finished after that date.

Related objects

- Sessions : session object
- Users : for the user and full name data
- Agents : agent object
- Jump server group : jump server configuration

Standard attributes

- **Type**: access log type, values:
 - logon
- **Protocol**: access protocol, values:
 - CONSOLE
 - HTTP
 - WSSO
 - ESSO
 - PAM
 - PAMRDP
 - PAMSSH
- **Start date**: date and time when access started.
- **End date**: date and time when access ended.
- **Session**: session identifier.
- **Server**: server where the authentication has been applied
- **Client**: server where the user started the session

- **IP Address:** IP of the server where the user started the session
- **Information:** additional connection information.
 - When the information is about the Authentication method, there are the following options:
 - **P:** Password
 - **K:** Kerberos
 - **E:** Broker
 - **O:** OTP
 - **M:** Email
 - **S:** SMS
 - **I:** PIN
 - **C:** Certificate
 - **F:** Finger print
 - **Z:** Push
 - **Account:** account used to apply the login
 - **User:** user who perform the access. The object is linked to the user screen.
 - **Full name:** full name of the user who perform the access. The object is linked to the user screen.
 - **Agent:** when the authentication is applied through an agent.
 - **Jump server group:** when the authentication is applied inside a jumpserver group.
 - **Target application:** application where the authentication has been applied

Actions

"Query buttons"	Allows you to query accounts through different search systems, <u>Quick and Advanced</u> .
"Table filter"	It allows you to filter a column in the table based on the results loaded in it.
Download CSV file	Allows you to download a csv file with the information of audit records.
View	Allows you to add or remove columns to the table. It is also possible to change the order of the columns.
