Application consents

Displays a list of all the user's consents given, and the user can see all of them. Users can remove the consent at any time as well.

When the user connects to a new application, the IdP will indicate which data will be shared with this application. That information is defined in the Attribute sharing policies page of the Federation.

> For more info about password recovery, you can visit the Attribute sharing policies page.

Actions

Change pasword	Allows the user to change their current password. The pop-up will display the restrictions applied according to your password policy. You must enter your current password. If you cannot remember it, it is best to use the password recovery option when logging in to the Console. This option is included in the password recovery add-on.
Undo	Allows you to undo any changes made.
Apply changes	Allows you to save the data. Once you apply changes, the details page will be closed.
