Soffid chat-bot

Description

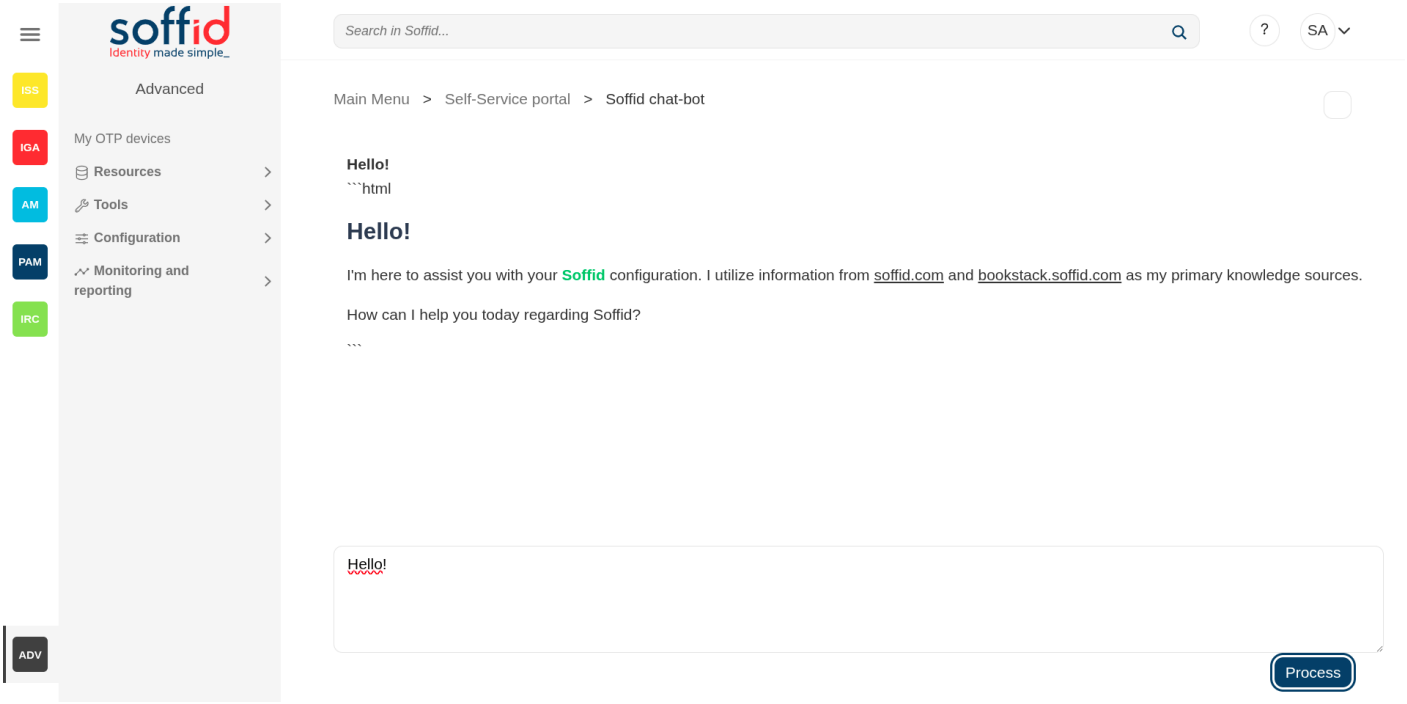

This new feature included in Soffid 4 allows you to interact with our AI to request information, or better yet, ask it to apply changes directly in the Console.

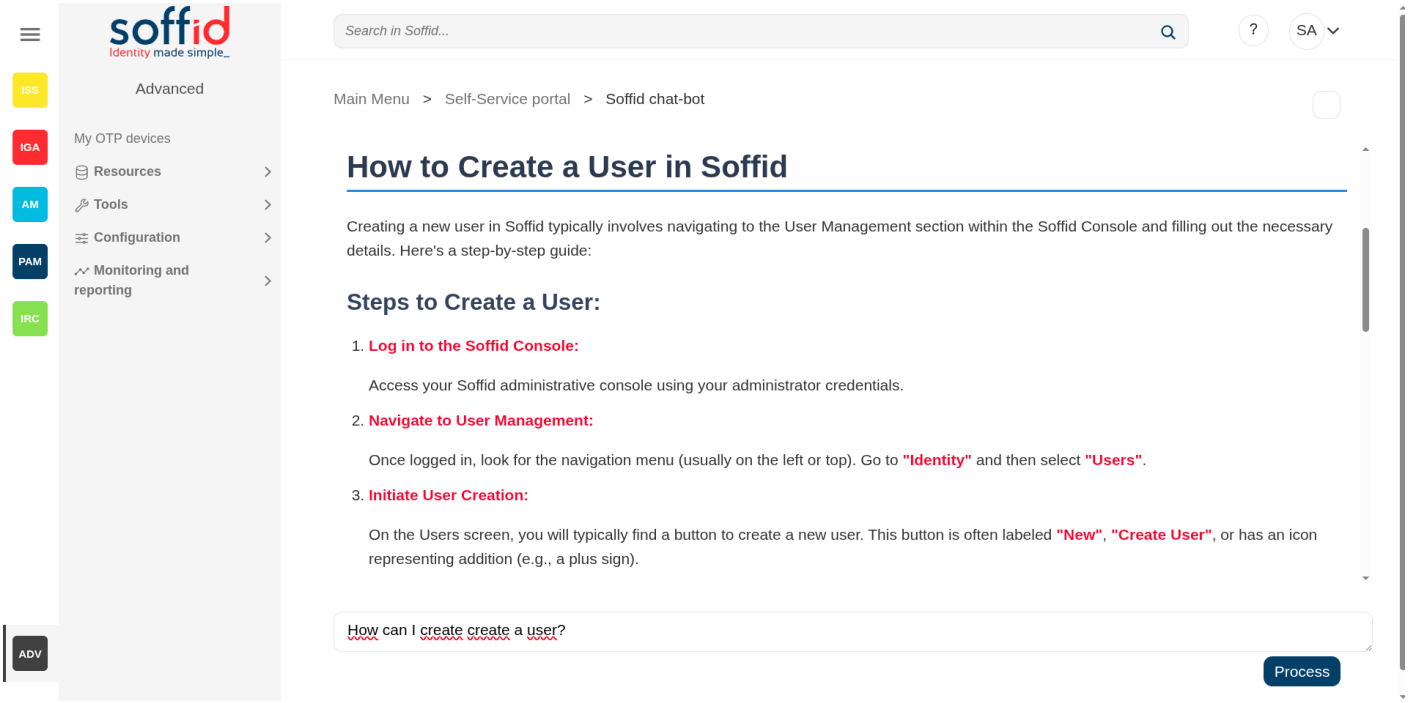

The power offered by this new tool is limitless. Our imagination, combined with training in Soffid's documentation and internal structure, enables us to accomplish many tasks.

This feature is not enabled by default, you must activate a token in order to use it. This feature has been reconfigured; please check out the following new feature.

2026-07-08 New feature: geolocation service available by default

Screen overview

Related objects

- Network Intelligence : to configure the token to use this feature
- Soffid chat-bot : to chat with our IA
- Custom scripts : to use the IA

> All pages with scripts can use the IA to help you with the scripting

Standard attributes

- **Chat box** : Type your query or request for our AI in the chat box.

Actions

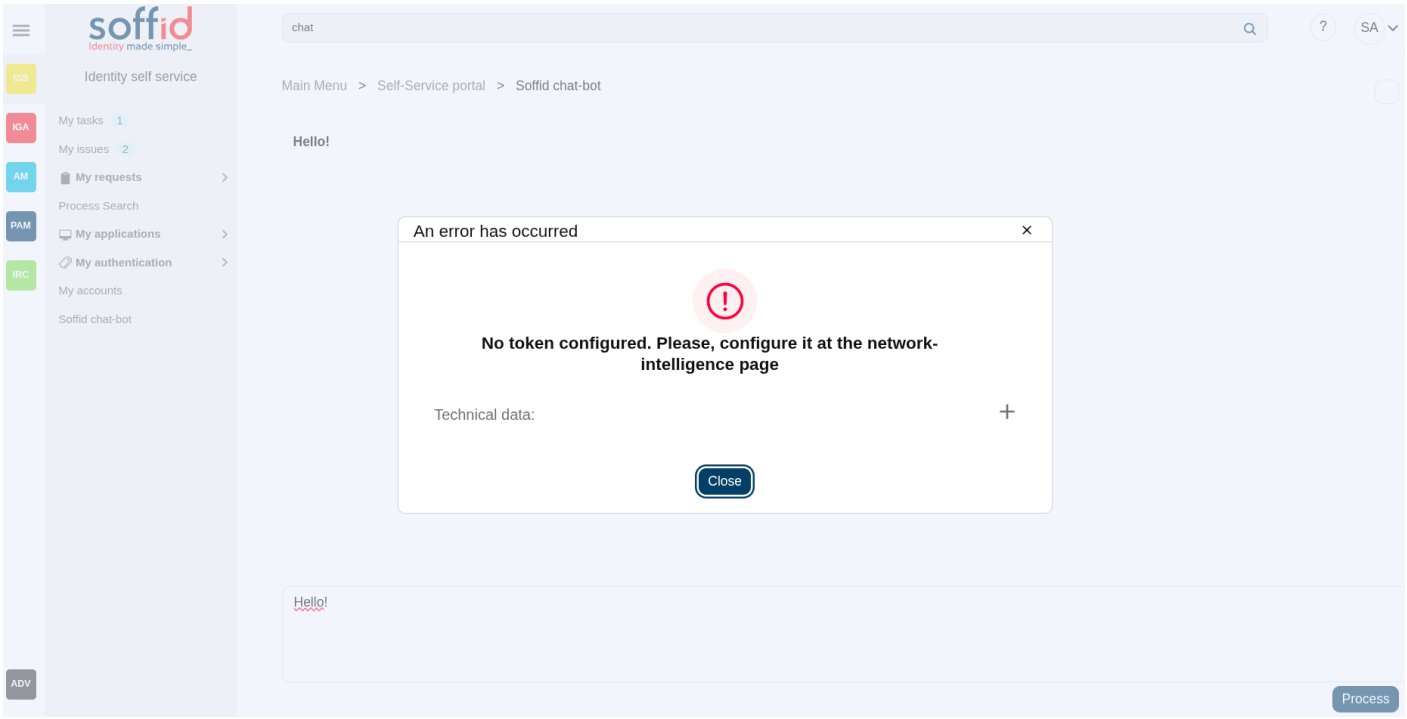

Process	Send the request to our AI for processing.

Others

Access without a token

When attempting to use this feature without having previously enabled it, the console displays the error: **No token configured. Please configure it on the network intelligence page**.

For more information go to Network intelligence page.
