# Getting started

## What is Soffid Authenticator?

Soffid provides an application to be used with Soffid Identity Provider to obtain SSO and MFA for any web or legacy application.

It supports one-click push authentication for login.

> Please note that for push authentication to work in corporate environments, you must allow access to the following URL **https://push-otp-notifier.tools.soffid.net/**

## Where can you find Soffid Authenticator?

Depending on your device, you can find Soffid Authenticator at the Google Play Store and Apple Store.
