

□ Getting started

What is Soffid Authenticator?

Soffid provides an application to be used with Soffid Identity Provider to obtain SSO and MFA for any web or legacy application.

It supports one-click push authentication for login.

Please note that for push authentication to work in corporate environments, you must allow access to the following URL **<https://push-otp-notifier.tools.soffid.net/>**

Where can you find Soffid Authenticator?

Depending on your device, you can find Soffid Authenticator at the Google Play Store and Apple Store.
