Policy reference

Description

The policy reference is used to reference a policy element. The reference is made by id of the policy. However, the mechanism for resolving a policy set reference to the corresponding policy is outside the scope of this specification.

Related objects

- **Policy**

Standard attributes

- **Identifier**: policy set identifier.
- **Version**:
  - **Specific version**: specifies a matching expression for the version of the policy referenced
  - **Version range**: specifies a range of version
  - **Any version**

Actions

Apply changes	Allows you to save the data of a new policy reference or to update the data of a specific policy reference. To save the data it will be mandatory to fill in the required fields
Undo	Allows you to quit without applying any changes.
Delete	Allows you to delete a policy reference. You can choose that option on the hamburguer icon. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.

Export	Allows you to export a XML file that contain the policy reference.
Add new version	Allows you to add a new versión of the policy reference
