Policy set reference

Description

The policy set reference is used to reference a policy set element. The reference is made by id of the policy set. However, the mechanism for resolving a policy set reference to the corresponding policy set is outside the scope of this specification.

Related objects

- **Policy set**

Standard attributes

- **Identifier**: policy set identifier.
- **Version**:
  - **Specific version**: specifies a matching expression for the version of the policy set referenced
  - **Version range**: specifies a range of version
  - **Any version**

Actions

Apply changes	Allows you to save the data of a new policy set reference or to update the data of a specific policy set reference. To save the data it will be mandatory to fill in the required fields
Undo	Allows you to quit without applying any changes.

Delete	Allows you to delete a policy set reference. You can choose that option on the hamburguer icon. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.
Export	Allows you to export a XML file that contain the policy set reference.
Add new version	Allows you to add a new versión of the policy set reference
