
Policy set reference

Description

The policy set reference is used to reference a policy set element. The reference is made by id of the policy set. However, the mechanism for resolving a policy set reference to the corresponding policy set is outside the scope of this specification.

Related objects

- **Policy set**

Standard attributes

- **Identifier:** policy set identifier.
- **Version:**
 - **Specific version:** specifies a matching expression for the version of the policy set referenced
 - **Version range:** specifies a range of version
 - **Any version**

Actions

| | |
|----------------------|--|
| Apply changes | Allows you to save the data of a new policy set reference or to update the data of a specific policy set reference. To save the data it will be mandatory to fill in the required fields |
| Undo | Allows you to quit without applying any changes. |

| | |
|------------------------|--|
| Delete | Allows you to delete a policy set reference. You can choose that option on the hamburguer icon. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation. |
