

Variables

Description

“ Variables are the elements to define functions that may be used throughout the policy.

Screen overview

The screenshot shows a web interface for configuring a variable. At the top, a dark header bar contains the word "Variable" and a tab indicator "1". Below the header, the "Variable name" field is set to "Variable name". The "Expression" section is expanded, showing a table with one row containing the value "true". To the right of the table, the "Expression type" is set to "Attribute value", the "Value" is "true", and the "Data type" is "Boolean". At the bottom right, there are "Undo" and "Close" buttons.

Expression
Filter
"true"

Total rows: 1

Expression type : Attribute value

Value : true

Data type : Boolean

Undo Close

Standard attributes

- **Variable name:** Name to identify the variable.
- **Expressions:** Any element of ExpressionType complex type.

Actions

Add new	Allows you to add a new variable to the variables list. To add a new variable you need to click the add button, located at the end of the header and fulfill the form and save the data.
Delete	Allows you to delete a variable to the variable list. To delete the variable, you need to click the variable you want to delete, and click the button with the subtraction symbol (-) at the end of the record. To perform that action, Soffid will ask you for confirmation, you could confirm or cancel the operation.
Close	Allows you to save the data of a new variable or to update the data of a specific variable. To save the data it will be mandatory to fill in the required fields
Undo	Allows you to quit without applying any changes.
